ACKNOWLEDGEMENT

Words are inadequate to circumscribe the effective feeling of gratitude and regards emanating from the innermost of my heart to my Guru and supervisor Prof. D.V.R. Sai Gopal, Department of Virology, SVUCS, Sri Venkateswara University, Tirupati, for planning this work, valuable guidance, providing the necessary facilities, precise approach and healthy encouragement with utterly patient support rendered by him in difficult time. Owing to him, I discovered the pleasures of perusing the research into the realm of scientific phenomenon, with total devotion and untiring efforts and untiring help amidst of his hectic schedule are unforgettable. I consider myself extremely fortunate to have him as my research supervisor and highly thankful to him for his parental care during my research period.

I can never express in words my sense of gratitude to the man of hardwork Dr. Sanachan Jadhao Scientist, SEPRL, Athens, USA, for his scientific cerebration, patient counseling, talented direction, constant encouragement and conscientious analysis. Sir has been a firm support, which I could always cling to at every stage of the endeavor.

I am highly grateful and indebted to Prof. D. Sreenivasulu, Department of Microbiology and Associate Dean, SV. Veterinary University, Tirupati for providing me the reference virus (BTV-2) and for allowing me to use all the lab facilities in the department. Apart from the facilities, constant monitoring of my research work, continuous inspiration and critical appreciation were more valuable for the progress of work.

I sincerely acknowledge Dr. T. Venkataramana Reddy, DMHO, Dr. M. Venugopal, DMO and the Mobile Medical Unit, District Medical Health Office, Kadapa, and several other physicians from Kadapa district of Andhra Pradesh for their help and assistance during the survey on Chikungunya fever. I specially thank DMHO, Kadapa for providing me the MACELISA kit for the detection of anti-Chik IgM antibodies. I acknowledge Mr. Rajaram and Mr. Lokesh (my old students), Sri Venkateswara College of P.G. studies, Kadapa for their help during chikungunya suspected blood sample collection.

I would like to sincerely thank Dr. A.M. Anthony Johnson, Research Associate Department of Virology, SVUCS, S.V. University, Tirupati for his help in designing the primers for the amplification of VP7 and NS3 genes of Bluetongue virus and also his aid in the phylogenetic analysis of the so called genes.
It has been a great privilege for me to acknowledge the cooperation I received from Dr. A. Gangi Reddy, Correspondent, all other senior faculty members and my previous colleagues, when I was working as one of the faculty member in the Microbiology Department, SV. College of P.G. Studies, Kadapa.

I would like to convey my sincere regards to Prof. Vishnuvardhan, BOS Chairman, Prof. Vijayalakshmi, H.O.D, Dr. Raghu Ram Asst. professor, Dr. Annapri, Asst. professor, Dr. Prathavathi, PDF, Department of Microbiology, Acharya Nagarjuna University, Guntur, for their advice, timely help and cooperation at all the times of my visit in the department, M.Phil. presentation and also during the submission of thesis.

I express my sincere thanks to Dr. M. Hema, Associate professor, Dr. M. Chaitra Devi, Dr. R. Ranjani and Dr G. Narasimha, Asst. professors, Department of Virology, SVUCS, S.V. University, Tirupati and Dr. Rani Prameela and Dr Vijayalaxmi, Dr Vinod Kumar, Asst. professors, S.V. veterinary University, Tirupati for their constant support and encouragement during the research period.

I am highly thankful to my colleagues Mrs. A. Sri Lakshmi, Mrs. N.S. Meera, Ms. Siddi, Mrs Saraswathi, Mr. Laxman and Mrs. Dakshini, Academic Consultants, Department of Microbiology, S.V. University, Tirupati for their sincere support and help in the management of teaching and practical hours when I was working as one of the Academic Consultant in the same department.

I would like to sincerely thank Mr A. Karthik, Senior Research Fellow, Dr Subra Subhadra, Dr Sanchya, Mr Subramanyam Reddy, Ms Munenna and Mr Mohan, S.V. Veterinary University for their affectionate help, cooperation and homely environment at all the time of working in the laboratory.

I am thankful to my co-scholars Dr Naresh Kumar, Mrs Vidya, Mrs Mahathi and Mr Tharanath and all other juniors for their cooperation in the Virology Department, S.V. University, Tirupati.

Friendship is something that makes the world going, the world is round so that friendship could encircle it. The encouragement and inspiration that I had received from all my friends and well wishers will be an invaluable asset in my life.
Where emotions are involved words case to mean. There are no words to pay regards to my parents Sri. Palle Subbarayudu and Smt. Lakshmidevi who took all the pains to make my dreams fulfilled. Their belief in me has always encouraged aspiring the highest. Their blessings, love and dedication helped me to take life as it comes and win. I shall always be remembering the love, caring support and affection of my elder brothers Mr. Siddhartha Rayudu and Mr. Chandra Gupta and all other family members.

The lack of vocabulary utterly fails me to express the stupendous weight of my heartfelt gratitude to my lovable hubby Mr. Suresh Male and my beloved Son Sanpreeth Male without whose affectionate love, moral support and encouragement I would not have completed my Ph.D. thesis work.

Last, but not least, I am highly thankful to the Almighty for providing me enough strength and courage to reach to this state. Except him

“No power in the world can deprive anybody of anything he really deserve”

(Mrs Palle Sangamithra)
