# List of Contents

## Acknowledgements

## List of Figures

## List of Tables

## Abbreviations

## Introduction
- Molecular Theories
- Cellular theories
- System level Theories
- Enzymes during development
- Enzyme induction during development
- Hormones during development
- Malate-aspartate shuttle
- Malate dehydrogenase
- Aspartate aminotransferase

## Experimental Procedures
- Materials
- Methods
  - Tissue preparation and extraction
  - Assay of malate dehydrogenase
  - Assay of aspartate aminotransferase
  - Reconstitution of malate-aspartate shuttle
  - Hormone treatments
  - Purification of cytosolic aspartate aminotransferase
  - Polyacrylamide gel electrophoresis
  - Kinetic studies
    - Effect of (L-aspartate) and (a-ketoglutarate) on purified c-AsAT
    - Effect of (amino-oxyacetil acid) on c-AsAT
    - Effect of urea on c-AsAT

## Results
- Normal endogenous activity of malate-aspartate shuttle enzymes
  - Malate dehydrogenase (MDH)
  - Aspartate aminotransferase (AsAT)
- Hormonal regulation of malate-aspartate shuttle enzymes
  - Effects of hydrocortisone (HC) and triiodothyronine (T3)
- Reconstitution of malate-aspartate shuttle
- Isolation and purification of liver c-AsAT
