Acknowledgements

Words are few when one needs to express what is deep in the heart. That is exactly the state I am in now when it is time to pen down thoughts about this journey. This entire work would not have been possible if it were not for the help I received from so many quarters. I take the opportunity to sincerely thank all.

I shall always remain indebted to Prof Ramesh Sharma, my Supervisor and Guide, for allowing me to work under his supervision. His meticulous and organized ways to deal with problems in a systematic manner will always be remembered. He has taught me to scientifically understand a problem, review it and then seek ways to solve it. His hard working and sincere nature have really been inspiring to me. I want to thank him for all that he has done.

Prof A. Alam, HOD, has been very kind in allowing me to use all the facilities of the Department, for which I remain ever thankful to him. Heartfelt thanks go out to Prof. R.N. Sharan who has always been very cooperative as I have spent a lot of time in his laboratory during my experiments. I would also like to thank the other teachers of the Department, Prof. A.R. Rai, Prof. R Lalthanthluanga, Dr P Syiem, Dr MB Syiem, Dr AK. Singh, Dr PK Ambasht, Dr L Kma, Dr S Bhan and Mr T Tripathy for their timely help and advice whenever approached.

I would like to acknowledge Dr Marbaniang, Dr Joshi and Dr Synshar of the poultry, Govt. of Meghalaya for their assistance during the entire period of my work. I feel a sense of obligation towards Devendra, Santosh, Shakti and Manisha of the Bioinformatics Centre, NEHU, who have assisted me for my Bioinformatics work. Pynkup, who has helped me so much with a lot of computational work and never declined any help, deserves a special note of thanks. You have become more of a friend! The non-teaching staff of the Department has also been really encouraging throughout and for this I would like to thank Mani Baboo Sir, Bah Bani, Kong Yen, Ma’am Pushpa, Bah Kharir, Bah Ponderly, Kong Judy, Kong Judap, Medhi Bhagya, Sahooji, Kong T, Kong Veronica and Kong Linda.

A special note of appreciation is due for Maniraj Bhagawati of the Department of Biophysics, University of Osnabrueck, Germany, for helping me in my initial literature survey.

My period of work in the laboratory has been possible for the ever helpful and friendly lab-mates I have, who have become close friends to me. Thanks for making me feel welcome in the lab. Danswangs my senior really helped me when I initially joined the lab and was always ready to patiently listen to me and to answer any queries I had. Daniel has been a wonderful lab-mate and very cheerful friend with whom I have had many a session of debating. Kit has been a jolly friend whose timely cracking of jokes kept the spirit alive and thanks for that!! I have to thank Preeti for all the help I have got from her
while doing experiments, mindboggling discussions and for being such a lovely friend. I would like to extend my thanks to the other juniors in my laboratory, namely Banri, Wanai and Teikur who have been extremely jovial and sincere in their work and helped in maintaining a wonderful lab atmosphere. Thanks to all of you!

Things would have been different had it not been for the other Research Scholars in the Department who have helped in many different ways. My gratitude goes out to Meriyani, RK, Khup and Sanghamitra who have always been there whenever I needed help of any kind. Words will not be enough to express my gratitude to Rennie and Yaashmin for the extent they went to help me during my benchwork. I also wish to thank the other research scholars Samrat, Amrita, Sukti, Wabang, Norna, Monita, Jignasa, Sameer, Ketel, Wilson, Banri, Elphius, Natasha, Bashisha, Ching, Gopesh, Auphelia, Vaintelyn, Robin, Shalimi, Stephanie and Kerdalin.

I have been privileged to have made some friends outside the Department like Gautam, Shing, Nebanita, Thomas, Fziz, Mithun, Pramod, Radhika, Ubanri and Sanjog who have been of assistance in various ways. Thanks to all of you!

My heartfelt thanks to Panchali, Debopriya, Anamika, Amit, Daman, Parthada for always believing in me and for being my friends.

I also extend my gratitude to the Principal of St. Edmund’s College, Dr. Ev Miranda, for allowing me to carry on my work. All the teachers of the college especially Biochemistry Department’s faculty, Dr. TDR, Dr. THR, Dr. OH, Dr. JW and Bah Niki have been extremely supportive and understanding in arranging classes for me in such a manner that I was able to devote most of my time to research work. A sincere note of thank you to each of you!

It is true that at times there are people who make a lot of difference and we don’t even find it necessary to acknowledge them. But, today Arunima, I want to thank you for being with me. Distance has not proven to be a hindrance in our teamwork. I have been able to rely on you at all times. I also thank you, Joydeep, for pushing me to extremes to help me complete my work. Thanks to you, Lux for the ever smiling ways. Saioba thanks for being a really patient listener at all times. Thanks Anju for being such a loyal, chirpy and wonderful friend.

Didibhai, Bubun and Kuttu thanks for being such wonderful siblings, who have stood by me through thick and thin. You are the best! I also thank Ma and Baba for being with me all this while and thank you Ma for sacrificing so much for me.

Finally, I thank everybody who has been instrumental in my completion of the work. There may be people who have slipped my mind at this moment and my apologies for that.
