ACKNOWLEDGEMENTS

I would like to express my gratitude, a deep sense of respect and indebtedness to my supervisor, Prof. Nawab H. Khan, formerly Chairman, Deptt. of Zoology whose learned guidance and constant supervision and provision of all the necessary laboratory facilities made the present work possible. Without his help this work would never have been completed. His simple straightforward attitude to overcome the various problems was the main source of strength for me. He taught me to be sincere in my research work, and punctuality in day-to-day life. These were a few guiding principles for me. To him, I pay a special tribute for giving final shape to this thesis inspite of his busy schedule.

Words fail to express my sincere thanks to Prof. Shamsul Ahmad, Chairman, Deptt. of Microbiology for providing the necessary facilities from time to time as also for allowing me to do the photomicrography in his laboratory. I cannot forget the ideal image of his kindness, helpful attitude and generosity towards the students. I am also thankful to all his research students and laboratory staff for their sincere help and co-operation.

I shall be failing in my duties if I do not extend my profound gratitude to my co-supervisor Dr. S. Shakeel A. Risvi,
Reader, Department of Pathology. Various suggestions and the necessary facilities provided by him encouraged me to complete this work in time.

I am also thankful to Prof. Ather H. Siddiqi, Chairman, (Department of Zoology); Prof. Sami Hamid; Prof. K.N. Ahmad; Prof. (Ms) Ansar A. Khan; Dr. (Miss) Nasoora Khan; Ms. Shaista (Department of Pathology) and Dr. Nafees Ahmed Farooqi (Department of Anatomy) for their generosity in providing requisite laboratory facilities to me.

My thanks are also due to my friends and colleagues.

I must pay my respect and cordial affection to my parents, brothers and sisters who never failed to encourage me throughout the period to complete this work on schedule. Their silent contribution towards the completion of this thesis was apparent in many ways.

Last but not the least, I am also grateful to the University Grants Commission for providing financial assistance in the form of a Senior Research Fellowship.
