ACKNOWLEDGEMENTS

Doing research and earning a degree is not just a simple race but it’s a heptathlon wherein you have to go through various trials and tribulations before you touch the finishing line. It is an exhilarating experience after touching the ribbon on completing a race and in the race of life nothing can be demarcated as being purely of sports or academic, the same experience applies to all acts of life. As in sports we need a coach who hones the skill, brings forth the hidden talent, guides and takes care of the minutest aspects leading to the road to perfection, in research we have guides who perform the same encore and well who else but Prof. K. Mohan Rao, who represent the highest echelons of this fast dwindling fraternity of sincere, enthusiastic and energetic supervisor, is a role model for me as a coach-cum-guide in my brief career of research of around three and half years. His constructive criticism, valuable comments, constant encouragement, and sometimes, soothing scolding, are some of the memories to be cherished the whole life. I cannot express my gratitude and acknowledgement in words since he is not part of vocabulary of any world renowned dictionaries, so I would like to be a bit moderate and pay him the highest tributes and regards and wish him all the very best for all his future endeavors. I hope this is not the end but just the beginning of a lifelong collaboration and I would like to be a part of his brilliant team of researchers forever.

I would like to express my deep sense of gratitude to the ex-heads, Prof. R. K. Poddar, Prof. R. H. D. Lyndoh, Prof. B. Myrboh, the present head of the department and ex-dean of physical sciences, Prof. K. Ismail for their constant encouragement and intelligent criticism but for which this work would not have reached the desired level. I would also like to express my deep and sincere gratitude to Dr. G. Bez, Dr. Evergreen, Dr. Rishan and all the faculty and non-teaching staff of the department for their helping hands during the course.
Not forgetting the invaluable assistance rendered by my collaborators in India and abroad, Mr. Babulal Das (IIT-guwahati), Dr. B. Therrien (Universite de Neuchatel), Dr. Chong Zheng (North Illinois University, USA), Dr. Yuriy A. Mozharovsky and Mr. Peng Wang (McMaster University, Canada), Dr. Glenn P. A. Yap (University of Delaware, USA), Dr. Steven Geib (University of Pittsburg, USA), Prof. Zhong-Yuan Zhou (Hongkong Polytechnical University, China), in collection and solving X-ray data set. Mr. Dikar, Dr. D. Dey, Dr. Wandon, Miss Lana, Mr. Johnny, Mr. Andy and SAIF (NEHU), SIF (IISC, Bangalore) for NMR, IR, Mass and UV-visible facilities.

I also wish to express my Appreciation to Dr. Promod, Dr. Mithun, Dr. Sanjesh, Dr. pushpak, Dr. Rudolf, Siam, Sujit, Johar, Sanjoy, Bebe, Keith, Sudeep, Bandry, Mithu, Avadesh, Govind, Uttam, Carol, John handrick, Hormi, Mantu, Tovishe, Aidad, Miranda, Shokib, Atoholi, Paia, Zwala, Barisha, Momo, Prunjal, Guna, Iadie, Bada, icy, Geromy, Abhisek, Devandra, Panna, Shravan, Santosh and all my research and hostel mates, who made many valuable suggestions and gave constructive advices and made my stay here in the campus a lively one.

It would be really a pity if I forget the constant support and encouragement I received from those who mattered the most in Shillong and they are my lab colleagues. I would like to thank Dr. Pachhunga, K. T. Prasad, Anna Rao (venky), Saphidabha, Gloria and Smita for their constructive suggestions and invaluable help.

Friends are the ones who reflect our true self and without whom life loses its colourful luster. The help, cooperation and encouragement throughout the whole course of study of research and personal life from all that I have pointed above and Karma, taru, ujjal, moutushi, ashish, Kavita, valentina, sharmila, Tapash, Anirban, Chandra Mouli Reddy, Krishna Mohan and many more are gratefully acknowledged.
Economics forms the backbone of our society and it is no different with me and hence I gratefully acknowledge the University Grant commissions for granting me fellowship.

I would like to express my heartiest thanks to Abhishek and Moutushi and their family members for their love, kindness and affection.

I would like to express my special thanks to Miss Khrielsha who always acted to me like a gramma. She helped me to concentrate on completing this dissertation and supported mentally during the course of this work. Without her love, time, help, understanding and constant encouragement and of course sometimes scolding as well, this study would not have been completed. I will always be in debt to her for every little thing she has done for me. I wish her a very long, happy and healthy life ahead and may she continue growing in the shadow & likeness of CHRIST.

Finally, I express my deep appreciation and indebtedness to my parents. The constant inspiration and guidance kept me focused and motivated. I am grateful to my dad for giving me the life I ever dreamed. I can’t express my gratitude for my mom in words, whose unconditional love has been my greatest strength. The constant, love, support, faith, patience, confidence, encouragements, inspiration and at times sacrifices of my sisters and brothers and my in laws is sincerely acknowledged.

The last and probably not the least I thank GOD the ALMIGHTY for every small and big thing and for giving me the strength to complete my work.

GAFENDRA GUPTA
