Abstract xviii

1. INTRODUCTION
   1.1 Historical Review 1
   1.2 Human Malaria Strains 3
   1.3 Rodent Malaria 4
   1.4 Simian Malaria 5
   1.5 Host-Parasite Relationship 5
   1.6 Pathology 6
      1.6.1 Spleen Pathology 7
      1.6.2 Liver Pathology 8
      1.6.3 Renal Pathology 9
   1.7 Cerebral Malaria 10
   1.8 Biochemical Changes 16
   1.9 Immunity 20
   1.10 Vaccines 23
      1.10.1 Sporozoite Vaccine 25
      1.10.2 Asexual Blood Stages Vaccine 27
   1.11 Adjuvants 30
AIMS AND OBJECTIVES

2. MATERIALS

2.1 Experimental Host
2.2 Cell Line
2.3 Anticoagulants
2.4 Anaesthesia
2.5 Chemicals
2.6 Conjugate and Substrate
2.7 Capillaries and Dialysis Tubing

3. METHODS

3.1.1 Maintenance of Plasmodium knowlesi
3.1.2 Maintenance of Plasmodium berghei
3.1.3 Counting of Parasites
3.1.4 Preparation of Leishman Stain
3.1.5 Fixing and Staining of Blood Film
3.2.0 Light Microscopic Studies
3.3.0 Transmission Electron Microscopic Studies
3.4.0 Photographic Apparatuses and Techniques
3.5.1 Extraction of Lipids from Discrete Brain Areas
3.5.2 Estimation of Total Lipids
3.5.3 Phosphate Estimation
3.5.4 Estimation of Cholesterol
3.5.5 Estimation of Gangliosides
3.5.6 Determination of Rate of Lipid Peroxidation
3.5.7 Preparation of Tissue Homogenate and Sub-Cellular Fractions 64

3.5.8 Estimation of Hydroperoxides 65

3.5.9 Estimation of Lipid Peroxides 67

3.5.10 Estimation of Superoxide Dismutase Activity 68

3.6.1 Antigen Isolation 71

3.6.2 Isolation of Parasites 72

3.6.3 Purity of the parasites Isolated from the Interface 72

3.6.4 Further Processing of the Antigen 72

3.6.5 Purity of the Isolated Antigen 73

3.6.6 Biomolecules Estimation 77

3.6.7 Checking the Antigenicity of Parasite Antigen 79

3.6.8 Immune Protection Studies in Vaccinated Rhesus Monkeys Using Muramyl Dipeptide as an Adjuvant 81

3.6.9 Detection of Humoral Immune Responses 81

A) Indirect Haemagglutination Test 81

B) Enzyme Linked Immunosorbant Assay 83

3.6.10 Assessment of Cell-Mediated Immunity 87

A) Delayed Type Skin Hypersensitivity Reaction 87

B) Leukocyte Migration Inhibition Test 88

3.6.11 Challenging the Animals 89

1) Detection of Humoral Immune Response 89

2) Assessment of Cell-Mediated Immune Response 90

3.6.12 Pathological Studies 91
4. RESULTS

4.1.1 Maintenance of *P. knowlesi* 92

4.1.2 Course of Infection in Monkeys Having Cerebral Malaria 96

4.2.1 Gross Findings 96

4.2.2 Light Microscopic Studies 96

4.3.0 Electron Microscopic Studies 97

4.4.0 Light Microscopic Studies of *P. berghei* Infected Mouse Brain 114

4.5.0 Biochemical Studies 127

4.6.0 Eye Involvement in Cerebral Malaria 135

4.7.0 Immunization of Rhesus Monkeys Against *P. knowlesi* using MDP as Adjuvant 135

4.7.1 Isolation of Malaria Parasite 135

a) Leukocyte Removal 135

b) Lysis of the Erythrocyte 145

4.7.2 Purification of Parasite 145

4.7.3 Purity of the Isolated Antigens 145

4.7.4 Antigenicity of the *P. knowlesi* Antigen 148

4.7.5 Biomolecule Estimation 148

4.7.6 Immunization Studies 148

a) Estimation of Humoral Immune Response 151

b) Detection of Cell-Mediated Immune Response 151

4.7.7 Protection Studies 154

4.7.8 Histopathological Studies of Immunized and Control (Infected) Monkeys Following Challenge 161

a) Liver 161
5. DISCUSSION

5.1.1 Light Microscopic Findings 186
5.1.2 Eye Involvement 188
5.1.3 Pathogenesis of Cerebral Malaria 190
5.2.0 Biochemical Studies 194
5.3.0 Mechanism Proposed for the Pathogenesis of Cerebral Malaria 198
5.4.1 Immunization of Rhesus Monkeys Using MDP as an Adjuvant : Protection Studies 202
5.4.2 Immunopathology 208

6. CLAIMS TO ORIGINALITY AND CONTRIBUTION TO KNOWLEDGE 211

7. BIBLIOGRAPHY 214

ANNEXURE I 239
