List of Figures

Figure 1. Calibration curve for dielectric constant. ..... 55

Figure 2. a) Plot of Rf values of metal ions Vs dielectric constant of formic acid-alcohol systems (common cations).... 56

b) Plot of Rf values of metal ions Vs dielectric constant of formic acid-alcohol systems (As+3, Sb+3 & Sn+2). 56

Figure 3. Plot of Rf values Vs dielectric constant in 1:9 formic acid-alcohol systems (Fe+3, Ni+2, Al+3, La+3). ..... 57

Figure 4. a) Plot of Rf Vs dielectric constant of the solvent system (common cations).......... 58

b) Dielectric constant of the solvent system Vs Rf values of cations showing exceptional behaviour ..... 59

Figure 5. a) Plot of Rf Vs acid concentration for 24 metal ions in butanol-formic acid systems.................. 96

b) Plot of Rf Vs acid concentration for 22 cations in isobutanol-formic acid systems............... 96

Figure 6. a) Plot of Rf Vs formic acid concentration (Representative plot)..... 96

b) Plot of Rf Vs formic acid concentration of cations showing exceptional behavior............. 96

Figure 7. Plot of Rf Vs formic acid concentration. (Some cations).................. 97

Figure 8. Plot of Rf Vs number of alcohol carbon atoms in (1:1) formic acid-alcohol systems.......... 97
Figure 9. Separation of $\text{Sn}^{2+}$ from numerous cations in cyclohexanol-formic acid system (7:3)......................... 97

Figure 10. Separation of $\text{Sb}^{3+}$ from numerous cations in cyclohexanol-formic acid system (7:3)......................... 97

Figure 11. Plot of spot area Vs concentration of $\text{Ag}^+$ and $\text{Hg}^{2+}$. ............................... 108

Figure 12. Plot of acid concentration Vs % of Sb in aqueous phase. ....................... 119

Figure 13. Plot of HCl concentration Vs % of Sb in organic phase. ....................... 119
