Acknowledgement

It is my privilege to record a deep sense of gratitude to my guide, Dr. Rafiuddin, Reader, Department of Chemistry, Aligarh Muslim University, Aligarh, for his continuous support and always there to listen and show me different ways to approach a research problem and the need to be persistent to accomplish any goal. Without his encouragement and consistent guidance, I could not have finished this thesis.

I am grateful to the Chairman, Department of Chemistry, Aligarh Muslim University, Aligarh, for extending research facilities.

I am also thankful to Prof. Wen-Bin Liau, Chairman, Department of Materials Science and Engineering, National Taiwan University, Taiwan, and Dr. Wenhe Gong, X-ray analyst, Brockhouse Institute for Materials Research, McMaster University, Canada, for their help in DSC and X-ray powder diffraction of my samples.

I would be failing in my duties if I don't mention the names of my laboratory colleagues Dr. Khasid Siraj, Dr. Huma Naseer, Miss Fakhra Jabeen and Mohd. Hassan for their co-operation and generous help.

Last, but not least, I am greatly indebted to my parents, my elder brother Mr. Masroor Ahmad and other family members for their encouragement and moral support during the course of this work.

Md. Sarfaraz Nawaz
