Acknowledgements

At the moment words are failing me to describe the surge of various emotions; of happiness, of gratitude, of my indebtedness to each and every helping hand that was offered to me in my way up to achieve this fruit of labour.

First and foremost, I prostrate before Almighty who was the directive energy behind all my efforts.

My sense of gratitude for my esteemed teacher and supervisor Dr. Mohammad Anis, Reader, Department of Botany, AMU, Aligarh, knows no bounds, who with his invaluable suggestions and encouragements always led me to my goal.

I am highly obliged to Prof. Samiullah, Chairman, Department of Botany and to Prof. Saeed A. Siddiqui, Late Prof. M. Wajid Khan and Prof. Wazahat Hussain, former chairmen of the Department for providing me necessary facilities and their kind support throughout the period of endeavour for doctoral study.

My special thanks are for my colleagues and friends especially Mr. Aijaz A. Wani, who has always been a source of inspiration and guidance for me at every step of my research work.

Back home, my entire family has been very supportive and kind to me. Especially my mother is to be thanked for all that she is to me...
and all that she gave me without asking. Her love and care proved to be a boon for me in my progress from the very childhood up to this stage.

I would extend my thanks to Mr. Zaheer Ahmad, who took great pains in typing my thesis with care.

The award of Junior Research Fellowship by Aligarh Muslim University is greatly acknowledged.
