ACKNOWLEDGEMENT

I bow with reverence to God, the great artisan and sustainer, Who enshowered His benevolence on me and provided me enough zeal to complete this work.

I deem it a great privilege in expressing my profound regard and deep sense of gratitude to my supervisor Dr. M. Maroof A. Khan whose professional acumen, meticulous suggestions, patient hearing, plausible and erudite thinking and obtrusive criticism helped me greatly in defying the conundrums of this work presented.

I owe sincere thanks to, the Chairman, Department of Botany, Aligarh Muslim University, Aligarh for providing me all the necessary research facilities.

It is my great privilege to express my sincere gratitude to Prof. M.M.R.K. Afridi, Prof. Firoz Mohammad and Dr. Moinuddin for their unstinted help and perpetual encouragement at various stages of this work.

I also express my indebtedness to Prof. Aqil Ahmad, Prof. Arif Inam, Prof R.P. Singh, Prof Nafees A. Khan, Dr. Athar Ali Khan, Dr. Shamshud Hayat and Dr. Qazi Fariduddin for their timely suggestions, moral support and immense help throughout the course of present work.

I feel lacking in words to express my profound sense of obeisance to my senior Dr. M. Nasem who was always available with inviting smile to guide through many pitfalls in the field of research. His encouraging attitude during the course of investigation was commendable.

I extend my thanks and deep sense of gratitude to my seniors and colleagues Dr. M. Mobin, Dr. Manzor H. Siddiqui, Dr. Shafeena Afroza, Dr. Saba Azad, Dr. Nasir, Aiman, Idrees, Masidur, Jariq, Neelima, Sangeeta,
Saba and Yousuf for their cooperation, good wishes and tremendous support during this work.

Just the thought of expressing my gratitude to my dearest friends Tabassum, Sabiha, Bushra, Iram, Iram Siddiqui, Champa and Gulshan plunges me into a deluge of emotions. I owe to them for their indispensable support and continuous encouragement showered with lots of love and prayers. I shall always cherish with fondness the spontaneous care and affection and sisterly love of my friends who stood by me even at worst of my times.

The words at my command are inadequate both in form and spirit to express my deep sense of indebtedness to my adorable Parents for their blessings, moral support and inspiration. I offer to them this piece of work as a token of love and respect. A special mention is required for my elder sisters Dr. Surabhi Chauhan and Nidhi Singh for their selfless affection and motivation. My other family members also deserve the acknowledgement from the depth of my heart.

I am also grateful to Mr. H.K. Sharma for extending his adept services on Computer for typing the manuscript.

The award of a fellowship by U.G.C., Government of India, New Delhi is also gratefully acknowledged.

With all faith in the almighty I place this work in the hands of my examiner with hope that he will bear with the shortcomings that might have crept into this thesis inadvertently.
