Acknowledgements

I have been accompanied and supported by many people in the completion of this thesis. I express my deepest gratitude to all of them for their support and help.

The first person whom I would like to thank is my Supervisor, Professor Muhammad Irfan, Physics Department, A.M.U., Aligarh. His enthusiasm to carry out research in front line areas has been a constant source of motivation for me. I shall always be indebted to him for his precious guidance, encouragement and keen interest throughout the present work. Without his benevolent personality this work would not have been possible. I would also like to express my deepest and sincere gratitude to my Co-Supervisor, Professor Sukalyan Chattopadhyay, HEP Division, SINP, Kolkata, who kept an eye on the progress of my work and was always available whenever I needed him. His gentle personality made me comfortable to learn more from him, especially during my stay at SINP, Kolkata and CERN, Geneva. I feel pleasure to thank Prof. Bikash Sinha, Director, VECC and SINP, Kolkata for his support and keen interest. Due to his efforts Indian Scientists, young researchers and Ph.D. students got opportunities to work in the prestigious International Collaborations, ALICE, CMS, etc.

I am grateful to Alain Tournaire and my friends Jacob Bastiaan Van Beelen and Miranda Van Stenis for their help and cooperation during the validation, installation and commissioning of detectors at CERN. I also thank Dr. Christophe Suire, IPN, Orsay, France for helping me in learning various controls on shifts during the Cosmic Ray Run at CERN.

My special thanks are also due to my friends, Mr. Sanjoy Pal and Mr. Indranil Das, HEP Division, SINP, Kolkata for their guidance about the hardware and software parts of the CPC of Station 2. I sincerely thank Prof. Suvendu Nath Bose, Dr. Tinku Sinha Sarkar, Prof. Pradeep Roy, Mr. Dipankar Das, Mrs. Lipy Paul, Dr. Pradip Dutta, Mr. Santosh Roy and other members of the MAP Lab, HEP Division, SINP, Kolkata for their help and support in completion of this work. It is my pleasant duty to
thank Prof. Swapan Sen and Prof. Sandip Sarakar, Micro Electronics Division, SINP, Kolkata, who designed MANAS chip and helped me during the testing and validation of MANAS chips.

I express my sincere thanks to Professor Mohd. Zafar, Physics Department, A.M.U., Aligarh for his keen interest and fruitful discussions. I also thank Dr. A. R. Khan for going through the manuscript and making some useful suggestions. I acknowledge with gratitude the cooperation and help I received from my senior colleagues, Dr. Nazeer Ahmad, Dr. M.M. Khan, and friends, Mr. Arshad Kamal, Mr. Arshad Ahmad Masoodi and Mr. Vipin Gaur. Help and cooperation received from Er. Mohd. Kashif and Mr. Iftikhar Ahmad Khan during fabrication of the tracking chambers are acknowledged with thanks. I also express my gratitude to Mr. S. M. Mahir, Er. Khalid Imdad, Mr. Kausar Saleem and Mr. Urfi Farooqui.

During this work I have collaborated with many colleagues and friends for whom I have great regard, and I wish to extend my heartfelt gratitude to all of them for their help, support and encouragement.

The chain of my gratitude and thanks would be definitely incomplete if I fail to thank the first cause of this chain. My deepest gratitude is for my family and those who are very close to me for their unflagging love and support throughout my life; this thesis would have been impossible without them. I am indebted to my parents to provide the best possible environment for me to grow up and learn. The generous support from my elder sister, Miss Ruby Zaheer, and younger brothers, Mr. Suhail Ahmad and Mr. Shoeb Ahmad, is thankfully acknowledged. I am greatly indebted to Miss Khushnood Parveen for always being there to support and encourage me whenever I felt down and disappointed.

Financial assistance from the DST, Government of India, New Delhi is acknowledged with thanks.

(M. Danish Azmi)
