## Contents

1. Introduction 1

2. Review of literature: Helicoverpa and entomopathogenic nematodes (EPN) 5
   2.1 Economic importance of Helicoverpa
      2.1.1 Host range
      2.1.2 Extent of damage
      2.1.3 Morphology, biology and ecology
      2.1.4 Control measures
         (ETL and population monitoring through pheromone, cultural control, host-plant resistance, chemical control, biological control, and IPM strategies)
   2.2 EPN and their role as biological control agent
      2.2.1 Introduction
      2.2.2 Biology and life cycle
      2.2.3 Bacteria – nematode symbiosis
      2.2.4 Mass production
      2.2.5 Bioefficacy

3. Pathogenicity, development and multiplication of Steinernema masoodi in Helicoverpa armigera 42

   ABSTRACT
   3.1 Introduction
   3.2 Materials and methods
      3.2.1 Nematode and insect culture
      3.2.2 Virulence test against Helicoverpa armigera
      3.2.3 Role of symbiotic bacteria in insect virulence
      3.2.4 Life cycle of Steinernema masoodi
      3.2.5 Steinernema masoodi multiplication in H. armigera
      3.2.6 Statistical analysis
   3.3 Results
      3.3.1 Virulence test against Helicoverpa armigera
      3.3.2 Role of symbiotic bacteria in insect virulence
      3.3.3 Life cycle of Steinernema masoodi
      3.3.4 Steinernema masoodi multiplication in H. armigera
   3.4 Discussion
4. Susceptibility of three lepidopteran pests to five *Steinernema* species and production of these nematodes

**ABSTRACT**

4.1 Introduction

4.2 Materials and methods

4.3 Results and discussion

5. Effect of temperature on survival of infective juveniles of *Steinernema seemae*, *S. masoodi* and *S. carpocapsae* and their infectivity to prepupa of *Helicoverpa armigera*

**ABSTRACT**

5.1 Introduction

5.2 Materials and methods

5.2.1 Nematodes and insect culture

5.2.2 Heat tolerance assay

5.2.3 Statistical analyses

5.3 Results and discussion

6. Survival of *Steinernema masoodi* and *S. carpocapsae* on pigeonpea and chickpea after foliar application

**ABSTRACT**

6.1 Introduction

6.2 Materials and methods

6.2.1 Nematodes and insect culture

6.2.2 *S. masoodi* survival on pigeonpea foliage

6.2.3 *S. carpocapsae* survival on chickpea foliage

6.2.4 Statistical analysis

6.3 Results

6.3.1 *S. masoodi* survival on pigeonpea foliage

6.3.2 *S. carpocapsae* survival on chickpea foliage

6.4 Discussion

7. Evaluation of *Steinernema masoodi* against soil-dwelling stage of *Helicoverpa armigera*

**ABSTRACT**

7.1 Introduction

7.2 Materials and methods

7.2.1 Nematode and insect culture

7.2.2 Laboratory experiments
7.2.3 Netted microplot field experiment
7.2.4 Statistical analysis

7.3 Results
7.3.1 Laboratory experiments
7.3.2 Netted microplot field experiment

7.4 Discussion

8. In vivo production of *Steinernema carpocapsae* and *Heterorhabditis indica* in *Corcyra cephalonica* and *Galleria mellonella* and economics of nematodes production

ABSTRACT

8.1 Introduction
8.2 Materials and methods
8.2.1 Nematodes and insect culture
8.2.2 *S. carpocapsae* production in *C. cephalonica*
8.2.3 *H. indica* production in *G. mellonella*
8.2.4 Statistical analysis

8.3 Results and discussion
8.3.1 *S. carpocapsae* production in *C. cephalonica*
8.3.2 *H. indica* production in *G. mellonella*
8.3.3 Economics of nematode production

9. Foliar application of *Steinernema masoodi*, *S. carpocapsae* and *Heterorhabditis indica* for *Helicoverpa armigera* management in chickpea

ABSTRACT

9.1 Introduction
9.2 Materials and methods
9.2.1 Insects and nematodes culture
9.2.2 Laboratory experiments
9.2.3 Field experiments
9.2.4 Statistical analysis

9.3 Results and discussion
9.3.1 Laboratory experiments
9.3.2 Field experiments
