ACKNOWLEDGEMENTS

The push to undertake this doctoral thesis emerged from questions that arose while working at the TISS Rural Campus with communities in Marathwada Region of Maharashtra in the 1980s and 1990s. Recurrent drought and water scarcity were pressing concerns and the complete inadequacy of policy and programmatic interventions brought a desire to develop a deeper understanding of the processes at work. Almost a decade passed in not even knowing what questions to ask. I owe a tremendous debt of gratitude to Prof Swapna Banerjee-Guha for starting a discussion, giving a direction to it and focus. Gradually it developed into this endeavour, focusing on an area located close to Mumbai where issues of community and nature also became critical. Initially, the work seemed daunting but as it progressed a feeling of excitement grew when I was able to see the research taking shape. I sincerely thank Prof. Banerjee-Guha for finally agreeing to be my guide, being with me every step of the way, not giving up on me and for pushing me to stretch myself. Her discipline, immense commitment to work, vast academic experience, ability to connect theoretical understanding with ground realities, and her ongoing quest for improvement set standards that have inspired, and will continue to inspire me in the future. I now look at research in a completely different way. The insights gained in the last gruelling but fascinating four and a half years have applied not just to the topic of my thesis, but also to every other aspect of my life. Prof. Banerjee-Guha has been instrumental in starting my process of discovery in this light. I have not come across any research guide who invests as much in their students and in doing so Prof. Banerjee-Guha became much more than a supervisor.

I thank Prof. S. Parasuraman, Director, TISS, a member of my Doctoral Advisory Committee, for introducing me to Prof. Banerjee-Guha and thereby opening up the possibility of this journey. I sincerely thank him for supporting my research throughout. Special thanks to Prof. Chitra Natarajan, Dean of Faculty of Science Education, Homi Bhabha Centre for Science Education (TIFR), for her support and encouragement as a member of my Doctoral Advisory Committee. The
cooperation and support of my colleagues – Manish Jha, H. Beck, Mouleshri Vyas, P.K. Shajahan, (late) Shiva Dhakal, Farrukh Faheem and Sohini Sengupta – was also an important factor in this endeavour. Shajahan’s input on automatic referencing was invaluable. It would have been wonderful if Shiva had been here to share this moment. Apart from many discussions and exchange of books, he was instrumental in giving me a critical entrée into Uran by introducing me to his adopted family, the Jamkars. They arranged for my stay during the field work, were a constant support, and gave me links to a network that transformed my field experience. There are as usual more people to thank than I can list here but I would like to specially mention the following friends from Uran: “Thakur Sir”, Sudhakar Patil, Sanjay Thakur, Bhushan Patil, “Patil Sir” and family, Nana Patil, Anant Gharat, Chetan Gaikwad, Swapnil Mali, Deepak Mali, Ghan:shyam Patil, Laxman Patil, Nathuram Patil, Bharati Mhatre, Shashi Yadav, Ramchandra Mhatre, Pradeep Patil, Vasanti Thakur, Urmila Darne, “Bhao”, J.P. Mhatre, Jagjivan Bhoir, Chandrakant Gharat, Jija, Shubhangi Patil and her family in Panje Village, and finally, Malati and her family in Govathane Village. My sincere thanks and gratitude to all the individuals and families in Uran for their hospitality and sharing contacts, information, life experiences and their views on what is happening in the region.

Notwithstanding tremendous challenges along the way, I could undertake this research quite comfortably. For this I have to thank Tata Institute of Social Sciences for the facilities, paid study leave and access to resources that might not have been available elsewhere. Particular mention needs to be made of the Librarian and staff of the Sir Dorabji Tata Library for their help and assistance in procuring books from various libraries across the country and the in-house digital/e-based materials. Prof. Lina Kashyap, Prof. Surinder Jaswal and the Doctoral Students Office staff have been extremely supportive for the administrative aspects of my doctoral work. I have also received encouragement and support from several colleagues and friends who helped with the rudiments of data software, sorting out snags in data entry, interesting discussions, and sharing
books and articles that they had come across. I would specially like to mention my colleagues Asha Mukundan, Sunil D. Santha, Suryakant Waghmore, Farrukh Faheem, and my other friends Rupesh, Aparajita and Alsaba. Several colleagues, particularly Lata Narayan, Vimla Nadkarni, and Sanober Keshwaar have gone out of their way to share my teaching and other responsibilities so that I could complete my doctoral work in time.

For assistance in preparing maps for this thesis, my thanks go to Dr. Prasad Gogate who assisted in the initial stage and Mr. Dnyaneshwar Bombe for preparing the final maps. I thank Mr. Santosh Palve for his help in translating some Marathi documents and Mr. A. Krishnan for assisting me with the final bibliography. Thanks are also due to the Directorate of Archives, Government of Maharashtra for granting me permission to access their maps, records and books for this thesis. My sincere thanks to Aparna Vedula and the other officers at CIDCO for assisting me with information on past and present projects, and for sharing their experiences of the development of New Mumbai.

My family was a tremendous source of support all through and without their backing I would not have been able to reach this point. My journey during this doctoral thesis has brought us together in a new way. My special thanks to Panakal Aunty for encouraging, supporting and sharing in the excitement of this research endeavour. Now while it will be possible to give more time to family and friends, simultaneously my academic life and efforts to connect it with grounded struggles makes a new start. It is a commitment to myself and all those who have contributed to this journey. But the work will go on in a different way, at a different place in time, and I can now say “Yes!” to many ideas that were sparked off in the course of doing this research and several other things that have been waiting in the wings.
