3.4 Discussion

Chapter: 4  Economics of deep-sea shrimp trawling operations  51–69

4.1 Introduction

4.2 Materials and methods

4.3 Results and discussion

4.3.1 Capital Investment

4.3.2 Fixed cost

4.3.3 Operational cost

4.3.4 Gross Revenue

4.3.5 Economic efficiency parameters

4.3.6 Problems and Prospects

4.4 Conclusion

Section III  Biology and stock assessment of Plesionika quasigrandis

Chapter: 5  Length weight relationship and condition factor  70–86

5.1 Introduction

5.2 Materials and methods

5.3 Results

5.3.1 Total length-weight relationship

5.3.2 Carapace length-weight relationship

5.3.3 Total length - carapace length relationship

5.3.4 Relative condition factor

5.4 Discussion

Chapter: 6  Reproduction  87–108

6.1 Introduction

6.2 Materials and methods

6.3 Results
6.3.1 Sexual dimorphism
6.3.2 Sex ratio
6.3.3 Egg developmental stages
6.3.4 Length at first maturity
6.3.5 Fecundity
6.3.6 Reproductive output and reproductive load
6.3.7 Spawning season
6.4 Discussion

Chapter: 7 Food and Feeding 109–123
7.1 Introduction
7.2 Materials and methods

7.3.1 General diet Composition
7.3.2 Diet composition in male, ovigerous and non-ovigerous females
7.3.3 Month wise variation in diet composition
7.3.4 Feeding intensity
7.4 Discussion

Chapter: 8 Age and Growth 124–140
8.1 Introduction
8.2 Materials and Methods
8.3 Results
8.3.1 Length frequency distribution and mean length
8.3.2 Growth parameters
8.3.3 Comparison of growth parameters
8.3.4 Recruitment pattern
8.4 Discussion

Chapter 9  **Stock assessment**  141–158

9.1 Introduction

9.2 Materials and methods

9.3 Results

9.3.1 Mortality coefficient

9.3.2 Exploitation rate and exploitation ratio

9.3.3 Probability of capture

9.3.4 Virtual population analysis

9.3.5 Relative yield per recruit and biomass per recruit

9.3.6 Biomass and maximum sustainable yield

9.4 Discussion

**Section IV**  **Summary and recommendations**  159–167

**References**  168–192

**Publications**
