ACKNOWLEDGEMENTS

First of all I pay my heartfelt gratitude to almighty God who provided me the vision and courage to complete this work. He guided me through every thick and thin through innumerable and invisible ways to fulfill this endeavor of mine.

I feel great pleasure to express my deep sense of respect and sincere gratitude to my supervisor Prof. S.A. Nabi, Professor, Department of Chemistry, Aligarh Muslim University, Aligarh, for learned suggestions, gracious guidance and constructive criticisms at every stage of my thesis work. In fact, his interest, untiring and ever willing help, sympathy and meticulous and talented guidance is insurmountable. I am really thankful to him that, in spite of his many preoccupations and heavy engagements, he supervised my work and has stimulated my interest.

It is my profound pleasure to express my sincere and deepest sense of gratitude, gratefulness and indebtedness to my co-supervisor Prof. R.P. Singh, Professor, Department of Botany, Aligarh Muslim University, Aligarh, for his systematic and analytical approach blended with constructive criticism and innovative ideas that helped me to understand the basics of the research and to overcome many experimental hurdles. His encouragement and attention at every stage of my research career provided me spirit to complete this work.

I am highly obliged to Prof. K. S. Siddiqui, Chairman, Department of Chemistry and Prof. Arif Inam, Chairman, Department of Botany, Aligarh Muslim University, for providing all the necessary facilities and materials for conducting my experiments.

I owe a special thanks to my mother and father. Their love, understanding, encouragement and belief in me have been my constant source of motivation and their words of endearment and praise provided me will to complete this work. I would also like to convey my thanks to my sister Mrs. Anuva Singh and my brother-in-law Mr. Prabal Pratap Singh for their moral support throughout my research period and to their kids Sakshi and Vikrudeep for their vibrant love and affection.

Words alone are not adequate to translate my thanks to my lab fellows specially Md. Shahadat, Garima Srivastava, Gazal Varshney and Ritu Singh for their encouragement and multifarious co-operation.

In the end I would like to express my special thanks to Council of Scientific and Industrial Research (C.S.I.R.), New Delhi, for providing financial assistance as Senior Research Fellowship to complete this work.

Sujata Singh
