Acknowledgement

All praise and thanks is due to Almighty Allah for the completion of this thesis and for His all guidance, kindness and blessings.

My sincere thanks go to my supervisor, Dr. Nadeem ur Rehman for his invaluable support, guidance, continuous encouragement, and suggestions, from the very early stage of this research and for giving me extraordinary experiences throughout the work. Above all and the most needed, he provided me unflinching encouragement and support in various ways. His truly scientific intuition has made him as a constant oasis of ideas and passions in mathematics, which exceptionally inspire and enrich my growth as a research scholar in mathematics. I am indebted to him more than he knows. His involvement with his originality has triggered and nourished my intellectual maturity that I will benefit from, for a long time to come. I am grateful in every possible way and hope to keep up our collaboration in the future. Also thanks for my supervisor for seeing through my drafts. In fact, without the invaluable assistance of him, this thesis would not have seen the light of day.

I feel highly honoured to put on record my profound thanks to Prof. M. A. Quadri, former Chairman, Department of Mathematics, Aligarh Muslim University, Aligarh, for his painstaking interest at all stages of my work. In fact, I am unable to express my indebtedness for all that I have learnt and got from him. I also feel highly honoured to put on record my profound thanks to Prof. Mohammed Ashraf, Professor, Department of Mathematics, Aligarh Muslim University, Aligarh, for his valuable advice, useful criticism and adequate guidance which enriched my work enormously. My thanks also due to Prof. S.K.Nauman, Professor, Department of Mathematics, King Abdulaziz University, Jeddah, Sudia Arabia, who has always been the source of inspiration and encouragement for me. I am very grateful for his patience, motivation, enthusiasm. I also avail this opportunity to record my respectful indebtedness to Dr.(Mrs.) Asma Ali, Reader, Department of Mathematics, Aligarh Muslim University, Aligarh. She has been actively interested in my
work and has always been available to advise me. I also express my sincere thanks to Dr. Shakir Ali, Lecturer, Department of Mathematics, Aligarh Muslim University, Aligarh. He has been actively interested in my work and has always been available to advise me.

Thanks and gratitude are due to Prof. Afzal Beg, the Chairman Department of Mathematics, Aligarh Muslim University, Aligarh for providing me all kinds of help during the course of this work.

My sincere thanks also goes to Prof. Mohammed Alshomrani, the Dean Faculty of Computer Sciences, King Abdulaziz University, Jeddah, Sudia Arabia, for his valuable advice and moral support.

I also express my appreciation to my colleagues Dr. Muzibur Rahman Mozumder, Dr. Abdullah Mohammed Shaghi and Mr. Abu Zaid Ansari. They have helped me all the time. I feel shortage of words to pay thanks to them. Many thanks go to Mr. Zaki for his encouragement and for providing me help and moral support.

I shall fail in my duty if I do not express here my deep sense of indebtedness my parents for their great support and willingness to educate me and supported spiritually throughout my life. I am also immensely indebted to my wife, for her love and moral support, and for putting up with what seemed to be endless hours of work which I spent on the different stages of the work.

(Radwan Mohammed Abdullah Al-Omary)
