ACKNOWLEDGEMENT

The present study was planned and carried out under the able and inspiring guidance of Mrs. Sajida Zaidi. The author is extremely happy to record his sense of heartfelt gratitude and indebtedness for her farsighted and scholarly guidance and constant encouragement at every step of my work.

The author wishes to express his thanks to Prof. Q.H. Zaidi for allowing the use of research facilities in the Department of Education, Aligarh Muslim University, Aligarh.

The author is also indebted to Late Prof. A. Mujib, who has helped in the initial stages of planning the problem.

Thanks are due to Prof. J.P. Guilford (U.S.A.) and to Prof. E.P. Torrance (U.S.A.) for their prompt replies to my inquiry regarding their tests of creativity.

Thanks are also due to Principals, Head Masters, Teachers and students of Public and Higher Secondary Schools of the Rajasthan State, with whose cooperation the study proceeded smoothly.

Thanks are also due to the staff of the following libraries for providing library facilities: Library, Department of Education, Aligarh, the Seminar Library, Department of Psychology, Aligarh, Azad Library, Aligarh Muslim University, Aligarh, Central Institute of Education.
Library, Delhi; National Council of Educational Research and Training Library, New Delhi, and the Libraries of Jaipur University and Banasthali Vidyapith, Rajasthan.

The author also wishes to thank Mr. R.N. Mathur, for typing this dissertation with care.
