The research work presented in this thesis has been carried out under the invaluable and expert guidance of Professor Mukhtar Ahmad. I consider it a privilege to have been associated with him for carrying out the research work towards my PhD degree.

My most sincere thanks are due to my colleague Dr. Atif Iqbal, Reader, Department of Electrical Engineering, Aligarh Muslim University, Aligarh, India for his endless support in this work. I have greatly benefited from his deep insight into the subject and constant support during numerous fruitful discussions. It is with a deep sense of my affection and gratitude that I wish to express my sincere thanks to him.

It is my duty to acknowledge Professor Prabhat Kumar, Chairman, Department of Electrical Engineering, Aligarh Muslim University, Aligarh, India for granting me research activities first and then the necessary facilities of the department. I would also like to thank Mr. Shaikh Moinuddin for his help in the experimental work.

I would like to thank All India Council for Technical Education (AICTE) and Vi-Microsystem, Chennai for providing me with the necessary project help to pursue my PhD degree at Department of Electrical Engineering, Aligarh Muslim University, Aligarh, India. I would like to thank my family, relatives and friends for their moral support for pursuing this work. Without their constant assurances and assistance, completion of this project would have not been possible.

Finally, the patience, understanding and co-operation provided throughout the work by my wife Shabana and daughter Nadia, who had to bear the constraints of my long working hours during the last three years, are greatly appreciated.

Above all I am grateful to Almighty, the most beneficent and merciful who provides me confidence and determination in accomplishing this work.

At last but not the least many thanks go to the technicians of the department of Electrical Engineering, Aligarh Muslim University, Aligarh, India, for their help during the course of study.
