ACKNOWLEDGEMENTS

It is my proud privilege to express my heartiest gratitude to my esteemed and worthy supervisor Dr. (Mrs.) Balbir Kaur (Professor and Head, Department of chemistry, Punjabi University, Patiala) for her intellectual, painstaking supervision and whole-hearted cooperation throughout these investigations. Her enthusiastic attitude, evolutionary ideas and generous conduct enabled me to complete this venture. Without her support, this work would not have been possible. Apart from the subject of my research I learnt a lot from her which I am sure will be useful in different stages of my life.

I owe a real debt of gratitude to former heads Dr. Baldev Singh and Dr. N. R. Dhamiwal, Department of Chemistry, Punjabi University, Patiala for providing me with necessary facilities and guidance during my research. I also express my genuine thanks to Dr. Mohammad Yusuf, for extending his help in interpreting the spectral data.

I am thankful to all teachers and other staff members of the department of Chemistry for their direct or indirect help in the course of investigation. I owe my sincere thank to Mr. Avtar Singh and Mr. R. K. Sharma, Regional Sophisticated Instrumentation Centre (RSIC), Panjab University, Chandigarh, Mr. Manish, NIPER, Mohali and Mrs. Harkesh Sohal (Retd.), Department of Chemistry, Punjabi University, Patiala, who are kind enough in extending the facilities for NMR, Mass and IR spectra.

I am thankful to all research scholars and to my sincere friends Dr. Ramandeep Kaur, Ms. Nisha, Ms. Sumeet and Ms. Varsha for their co-operation during the course of work.

One cannot forget the strength and support one gets from the family. With gratitude and astonishment, I acknowledge and admire the unbounded love, constant inspiration and moral support bestowed on me by my dear parents, Sh.

I will be failing in my duty if I do not acknowledge my thanks to my life-partner, Amit Singla for his love, affection, moral support, tireless efforts and constant inspiration, which made it possible to fulfill this task. I would also like to acknowledge my little kids, Jiya and Vansh, for the sweet love they showered on me which gave me support to go through in tough times.

Last but not the least, I would like to admire the Almighty, Who provided me great enthusiasm and passion that made all things possible.

Day  Month Year  Monika Bansal
