ACKNOWLEDGEMENTS

I have no words to express my deep sense of gratitude to my learned supervisor, Professor (Mrs.) Ghazala Anwar Ansari, formerly the Chairman, Department of Education, Aligarh Muslim University, Aligarh, for her invaluable guidance and enlightening suggestions throughout the course of my research work. I am also profoundly indebted to her for her sympathetic and encouraging attitude which sustained my interest in the work even at times when I was beset with many distracting personal problems.

I am thankful to Professor (Miss) Safia Sultana, Chairman, Department of Education, Aligarh Muslim University, Aligarh, for providing necessary facilities.

I also feel impelled to put on record my gratefulness to Mr. M.R. Verma, formerly the Reader in the Department, with whom I had the privilege to discuss certain statistical problems involved in my study.

My sincere thanks are also due to Dr. Qamar Hasan, Reader, Department of Psychology, for his useful suggestions in designing the research project at the initial stage.

I must also acknowledge with thanks the help and cooperation extended to me by my senior colleagues in the Department, the Principals and teachers of the University Schools and the library staff at different stages of my research work.

NAJMUL HAQ
