Section 2.

Part I. Verification of external criterion .......................... 182
Part II. Verification of internal criterion No. 1 ................... 184
Part III. Verification of the internal criterion No. 2 ............... 195

Section 3. Summary of the findings .................................. 198

Chapter VI. SUMMARY OF MAIN CONCLUSIONS ...................... 207

LIST OF TABLES

Table I. Vernon's factor solution of Stephenson's results ........ 13
Table II. Showing five years' progress report of the boys in three different schools ........................................... 55
Table III A. Showing the selection of subjects under different age groups without treatment arrangements ........................... 60
Table III B. Showing the selection of subjects under different age groups without treatment arrangements ....................... 61
Table IV. Showing the plan of the administration of the tests .... 65
Table V. Normalisation of the raw scores of Vernon's Non-Verbal 'g' test ................................................................. 68
Table VI. Limits of P.R. corresponding to respective normal scores.. 69
Table VII. Showing the combinations of optional subjects offered by the students ......................................................... 75
Table VIII A. Showing the distribution and normalised scores of examination marks in English ........................................... 77
Table VIII B. Showing the distribution and normalised scores of examination marks in Mathematics ............................... 78
Table VIII C. Showing the distribution and normalised scores of examination marks in Hindi ........................................... 79
Table VIII.B. Showing the distribution and normalised scores of examination marks in Science .......................... 80

Table VIII.D. Showing the distribution and normalised scores of examination marks in literary subjects ....................... 82

Table IX. A. Showing the distribution of un-rotated bi-polar Factor II (positive) scores : English and Mathematics ability scores combined and normalised ............... 84

Table IX. A. Showing the distribution of un-rotated bi-polar Factor II (negative) scores : Hindi and Scientific scores combined and normalised .......................... 85

Table IX. A. Showing the distribution of Educational ability factor (rotated) scores combined and normalised .............. 86

Table IX. A. Showing the distribution of literary-numerical ability Factor (rotated) scores combined and normalised .......................... 87

Table I. A. Showing correction of raw scores for V.I.T. ............ 92

Table I. A. Showing correction of raw scores for V.I.T. (Extra-Number) .......................................................... 92

Table I. A. Showing correction of raw scores for Raven's Non-Verbal 'g' ........................................................................ 94

Table I. A. Showing correction of raw scores for Raven's Progressive Matrices ......................................................... 99

Table I. A. Showing the distribution and normalised scores of V.I.T. (Total) ............................................................... 100

Table II. A. (Classification) ......................................................... 100

Table II. A. (Analogies) .............................................................. 101

Table II. A. (Synonyms) .............................................................. 102

Table II. A. (Extra Number) ....................................................... 103

Table II. A. (Completion) ............................................................ 104

Table II. A. (Paragraph) ............................................................ 105

Table II. A. (Best Reason) .......................................................... 106

Table II. A. (Simple Reasoning) .................................................. 107
Table XII. B. Showing the distribution and normalised scores of Vernon's 'g' .......................................................... 104

Table XII. C. Showing the distribution and normalised scores of Raven's Progressive Matrices ....................................... 110

(i) Test A. .................................................. 110 A

(ii) Test B. .................................................. 111

(iii) Test C. .................................................. 112

(iv) Test D. .................................................. 113

(v) Test E. .................................................. 114

Table XII. D. Showing the distribution and normalised scores of Vernon's Block Design .................................................. 116

Table XII. E. Showing the distribution and normalised scores of Vernon's Pattern Drawing ............................................. 118

Table XII. F. Showing the distribution and normalised scores of Vernon's Graded Arithmetic-Mathematic ............................. 121

Table XIII. Showing the reliability of Split-half method and with the help of Kendall-Richardson formula ................................. 123

Table XIII. Showing correlation between the six ability tests .......................... 134

Table XIV. A. First Factor residuals with their proper signs ........... 139

B. Second Factor residuals with their proper signs ........... 140

C. Final residuals with their proper signs ......................... 140

Table XIV. A. Factorial Analysis of the battery of Ability Test (including V.I.T.) : showing Factor Loadings, Factor Variances and $R^2$ ............................................. 141

B. Factor solution : Factor I and III rotated at an angle of 120° 59' : Factor II and II rotated at an angle of 46° 48' ....................................................... 144

C. Showing average rotated Factor Loadings ....................... 144
Table XIV. A (i) Showing the group factor analysis by Spearman's technique diagonals ........................................... 146

(ii) Showing the group factor analysis by Spearman's technique diagonals ........................................... 147

Table XVI. A. Showing the critical ratio with the probability values (at 17½% level) ........................................... 150

Table XVI. B. Showing the critical ratio with the probability values (at 27½ level) ........................................... 151

Table XVII. Showing correlation coefficients between the examination marks in school subjects (including V.I.F.) ......................................................... 152

Table XVIII. A. Factor Analysis of examination marks in school subjects (including V.I.F. also), showing Factor Loadings, Factor variances and h² .......................... 156

B. Factor solution : Factor I and III rotated at an angle of 25° 29½; Factor II and II rotated at an angle of 32° 13½ ......................................................... 157

Table XIII. A. Showing the results of percentage differences at 17½% level as an index of the differentiation between the schools in terms of internal criterion No.2(a) ...162

B. Showing the results of percentage differences at 27½% level as an index of the differentiation between the schools in terms of internal criterion No.2(a) ..163

Table XI. A. Showing the results of percentage differences at 17½% level as an index of the differentiation between the schools in terms of internal criterion No.2(b) ...163

B. Showing the results of percentage differences at 27½% level as an index of the differentiation between the schools in terms of internal criterion No.2(b) ...164

Table XII. Showing the obtained orders of the schools according to the criteria ......................................................... 165

Table XIII. A. Showing the totals of the highs (15) and the lows (15) picked up on the basis of unrotated $k_2$ (i.e. Maths. and English) ......................................................... 167

B. Showing the totals of highs (15) and the lows (15) picked up on the basis of unrotated $k_2$ (i.e. Hindi and Science) ......................................................... 167
Table XIII. A. Showing totals of the high (15) and the low (15) picked up on the basis of rotated $k_2$: Literary-linguistic-numerical attainment (i.e., Maths, English, Literary subjects) .................................................. 168

D. Showing totals of the high (15) and the low (15) picked up on the basis of rotated $k_2$: good expression (i.e., all the school subjects - V.I.T.) .... 168

Table XIII.A. Plus indicating tops and minus indicating bottoms selected under altered plan IV: Rotated Factorwise .... 169

B. Plus indicating tops and minus indicating bottoms selected under altered plan III: Unrotated factorwise when Factor II and Factor III plotted in a graph ................................. 171

Table XIV. Showing critical ratio between the schools ........... 174

Table XIV. Showing 't' values between the high (15) and the low (15) groups selected on the basis of unrotated $k_2$: (i.e., Maths and English) ........................................... 176

Table XVI. Showing 't' values between the high (15) and the low (15) groups selected on the basis of unrotated $k_2$: (i.e., Hindi and Science) .......................... 176

Table XVII. Showing 't' values between the high (15) and the low (15) groups selected on the basis of Factor $k_2$: (i.e., literary-linguistic-numerical, including Maths, English and Literary subjects) ............. 178

Table XVIII. Showing 't' values between the high (15) and the low (15) groups selected on the basis of Factor $k_2$: (i.e., good expression group, including all school subjects) ......................................................... 179

Table XIX.A. Showing 't' values between the high (45) and the low (45) groups selected on the basis of rotated Factors I', II' and II': (i.e., all school subjects + V.I.T., good expression and literary-linguistic-numerical attainment) ......................................................... 180

B. Showing 't' values ........................................ 181
Table III, A. Showing summary of the orders maintained by the schools when classified under plan I and II .......... 200

Table III, B. (i) Showing summary of the orders maintained by the schools when classified under plan III and IV .......... 201

(ii) Showing summary of the orders maintained by the schools when classified under plan III and IV .......... 204

Table III, C. Showing summary of the orders maintained by the schools when classified under plan V .......... 206

LIST OF FIGURES

Figure I  Illustrating Hierarchical structure of Human Abilities .......... 17

Figure II  Plotting of the Factor Loadings of School subjects .......... 157 A.
