LIST OF FIGURES

I. Flow chart of study subjects.
II. Age group wise prevalence of cardio metabolic risk in study subjects.
III. Age group wise distribution of premenopausal subjects with and without cardio metabolic risk.

IV. Age group wise distribution of postmenopausal subjects with and without cardio metabolic risk.

V. Prevalence of different cardio metabolic risk parameters in pre and postmenopausal subjects.

VI. Percentage of subjects with Haemoglobin content less than 12gm% in different groups.

VII. Association between anaemia and cardio metabolic risk in subjects.
VIII. Cardio metabolic risk in premenopausal and post menopausal subjects from different ethnic groups.

IX. Comparison of prevalence of different cardio metabolic risk indicators in subjects from different ethnic groups.

X. Urban / Rural difference in profound cardio metabolic risk among subjects from different communities.

XI. Urban / Rural difference in prevalence of individual cardio metabolic risk factor in subjects from different communities.

XII. Role of level of education on cardio metabolic risk profile of the study population.

XIII. Role of family income on cardio metabolic risk profile of the study population.

XIV. Role of dietary habits on cardio metabolic risk profile of the study population.
