LIST OF TABLES

I. Country-wise cut off for waist circumference
II. Distribution of subjects from different ethnic groups
III. Cut offs for different cardio metabolic risk factors according to harmonized criteria
IV. The details of Anthropometric parameters evaluated in the subjects.
V. The details of Cardio metabolic parameters evaluated in the subjects.
VI. The details of Anthropometric parameters evaluated in premenopausal and postmenopausal subjects.
VII. The details of Cardio metabolic parameters evaluated in premenopausal and postmenopausal subjects.
VIII. Percentage of premenopausal and postmenopausal subjects with three or more cardio metabolic risk factors according to modified consensus statement for Asian Indians.
IX. Baseline characteristics of subjects with and without cardio metabolic risk.
X. Prevalence of single cardio metabolic risk component among subjects.
XI. Comparison of cardio metabolic risk indicators in pre and postmenopausal women with and without profound cardio metabolic risk.
XII. Values of different obesity indices according to cut offs of different metabolic risk factors in premenopausal women using consensus criteria of cardio metabolic risk factors for Asian Indians.
XIII. Values of different obesity indices according to cut offs of different metabolic risk factors in postmenopausal women using consensus criteria of cardio metabolic risk factors for Asian Indians.
XIV. Values of various atherogenicity markers according to cut offs of different metabolic risk factors in pre and postmenopausal women using consensus criteria of cardio metabolic risk factors for Asian Indians.
XV. Correlation between cardio metabolic risk factors and obesity markers.
XVI. Correlation between cardio metabolic risk factors and atherogenicity markers.
XVII. The details of Haematological parameters evaluated in the subjects.
XVIII. Coexistence of cardio metabolic risk in subjects with anaemia.
XIX. Distribution of subjects with three or more cardio metabolic risk factors
from different ethnic groups

XX. Status of various cardio metabolic risk indicators in women from different ethnic groups.

XXI. Comparison of oxidant and antioxidant levels in subjects with and without cardio metabolic risk.
