I INTRODUCTION		
1.1	Gas sensors	16
1.2	Need for gas sensors	17
1.3	Classification of gas sensors	18
	1.3.1. Potentiometric sensors	
	1.3.2. Amperometric sensors	
	1.3.2. Conductometric sensors	
1.4	Working principle of semiconductor gas sensor	23
1.5	Materials for gas sensors	29
1.6	Electro-Physical properties of gas sensor materials	31
	1.6.1. Band gap	
	1.6.2. Electrical conductivity	
	1.6.3. Types of conductivity	
	1.6.4. Oxygen diffusion in metal oxides	
	1.6.5. Refraction index	
	1.6.6. Dielectric constant	
1.7	Methods for the preparation of gas sensor materials	41
	1.7.1. Sol-Gel process	
	1.7.2. Spray pyrolysis	
	1.7.3. Combustion method	
	1.7.4. Microwave method	
	1.7.5. Hydrothermal synthesis	
	1.7.6. Chemical vapour deposition	

1.7.7. Physical vapour deposition	
1.8 General characterization of sensor materials	48
1.9 Sensor fabrication/Design	49
1.10 Parameters that determine the sensor performance	55
1.10.1. Operating temperature	
1.10.2. Conductance	
1.10.3. Calibration cure	
1.10.4. Base line	
1.10.5. Sensitivity	
1.10.6. Response time	
1.10.7. Selectivity	
1.11 Applications of gas sensors	59

II LITERATURE SURVEY AND SCOPE OF THE PRESENT INVESTIGATION	
2.1. Introduction	66
2.2. Literature survey	66
2.3 Scope of the present investigation	79
<i>References</i>	82
III EXPERIMENTAL DETAILS	
3.1 Materials used	88
3.2 Synthesis of InNbO_4 nanopowder	89
3.3 Synthesis of CrNbO_4 nanopowder	92
3.4 Synthesis of AlNbO_4 nanopowder	94
3.5 Synthesis of LaNbO_4 nanopowder	96
3.6 Synthesis of FeNbO_4 nanopowder	98
3.7 Physical characterization	

3.7.1	Thermogravimetric studies	100
3.7.2	Differential thermal analysis	102
3.7.3	X-Ray Diffraction studies	107
3.7.4	Scanning electron microscope studies	111
3.7.5	Transmission electron microscope studies	114
3.7.6	Energy- Dispersive X-ray spectroscopy studies	117
3.7.7	BET surface area measurement	118
3.7.8	Diffuse reflectance measurement	120
3.7.9	Impedance analysis	122
3.7.10	Sensor studies	131
	<i>References</i>	135
IV RESULTS AND DISCUSSION		
4.1	InNbO₄ nanopowder	137
4.1.1	TG/DTA analysis	
4.1.2	X-Ray Diffraction analysis	
4.1.3	SEM studies	
4.1.4	TEM studies	
4.1.5	Energy- Dispersive X-ray spectroscopy studies	
4.1.6	Diffuse reflectance spectra	
4.1.7	Impedance studies	
4.1.8	BET specific surface area studies	
4.2	Gas sensing behaviour	
4.2.1	Gas sensitivity with operating temperature	
4.2.2	Sensor sensitivity with gas concentration	
4.2.3	Sensor response with time	
4.3	CrNbO₄ nanopowder	157
4.3.1	TG/DTA analysis	
4.3.2	X-Ray Diffraction analysis	
4.3.3	SEM studies	
4.3.4	TEM studies	
4.3.5	Energy- Dispersive X-ray spectroscopy studies	
4.3.6	Diffuse reflectance spectra	
4.3.7	Impedance studies	
4.3.8	BET specific surface area studies	
4.4	Gas sensing behaviour	
4.4.1	Gas sensitivity with operating temperature	

4.4.2	Sensor sensitivity with gas concentration	
4.4.3	Sensor response with time	
4.5	AlNbO₄ nanopowder	177
4.5.1	TG/DTA analysis	
4.5.2	X-Ray Diffraction analysis	
4.5.3	SEM studies	
4.5.4	TEM studies	
4.5.5	Energy- Dispersive X-ray spectroscopy studies	
4.5.6	Diffuse reflectance spectra	
4.5.7	Impedance studies	
4.5.8	BET specific surface area studies	
4.6	Gas sensing behaviour	
4.6.1	Gas sensitivity with operating temperature	
4.6.2	Sensor sensitivity with gas concentration	
4.6.3	Sensor response with time	
4.7	LaNbO₄ nanopowder	198
4.7.1	TG/DTA analysis	
4.7.2	X-Ray Diffraction analysis	
4.7.3	SEM studies	
4.7.4	TEM studies	
4.7.5	Energy- Dispersive X-ray spectroscopy studies	
4.7.6	Diffuse reflectance spectra	
4.7.7	Impedance studies	
4.7.8	BET specific surface area studies	
4.8	Gas sensing behaviour	
4.8.1	Gas sensitivity with operating temperature	
4.8.2	Sensor sensitivity with gas concentration	
4.8.3	Sensor response with time	
4.9	FeNbO₄ nanopowder	216
4.9.1	TG/DTA analysis	
4.9.2	X-Ray Diffraction analysis	
4.9.3	SEM studies	
4.9.4	TEM studies	
4.9.5	Energy- Dispersive X-ray spectroscopy studies	
4.9.6	Diffuse reflectance spectra	
4.9.7	Impedance studies	
4.9.8	BET specific surface area studies	

4.10	Gas sensing behaviour	
4.10.1	Gas sensitivity with operating temperature	
4.10.2	Sensor sensitivity with gas concentration	
4.10.3	Sensor response with time
