CONTENTS

INTRODUCTION .......................... 1

The Vindhyan "System" .................. 1
Choice and location of investigated area 3
Aim and scope of investigation .......... 4
Acknowledgements ....................... 6

CHAPTER I - STRATIGRAPHY AND SEDIMENTARY CHARACTERS
OF BHANDER GROUP ................. 8

Nomenclature and classification .......... 8
Regional stratigraphic relationships .... 11
Mandalgarh-Singoli area ................ 16
  Ganurgarh Shale ...................... 17
  Bhander Limestone ................... 20
  Sirbu Shale .......................... 25
  Bhander Sandstone ................... 31

CHAPTER II - SEDIMENTARY STRUCTURES ..... 39

Directional structures .................. 41
  Cross-stratification .................. 41
  Ripple marks .......................... 48
  Flute cast and flute mark .............. 55
  Current-drag structure ............... 57
  Parting lineation ..................... 59
  Swash mark ................................ 60
  Rill mark ................................ 61
  Groove cast ................................ 61

Non-directional structures .............. 63
  Load structure .......................... 63
  Ball-and-pillow structure .............. 64
  Convolute lamination .................. 65
  Mud crack ................................ 67
  Algal mat structure ................... 69

CHAPTER III - PETROGRAPHY ............. 70

Petrography of sandstones .............. 70
  Sampling ................................ 71
  Methodology and presentation of data . 72

**CHAPTER IV - DEPOSITIONAL ENVIRONMENTS**

- Concept of depositional environment | 101
- Model of nearshore marine sedimentation | 102
  - Tidal flats and channels | 103
  - Lagoons | 107
  - Beaches | 108
- Environmental analysis of Bhandar Group | 110
  - Ganurgarh Shale | 110
  - Bhandar Limestone | 116
  - Sirbu Shale | 129
  - Bhandar Sandstone | 134
- Environmental synthesis | 139
  - Vertical relationships | 139
  - Tectonic framework | 143

**CHAPTER V - PALEOGEOGRAPHY AND SEDIMENT DISPERSAL PATTERN**

- The problem and approach | 145
- Directional data | 147
  - Directionals and their distribution | 147
  - Sampling | 148
  - Variability analysis | 151
- Scalar data (thickness and isopach map) | 166
- Paleogeographic reconstruction | 167
  - Shore line orientation | 167
  - Paleoslope | 172
- Dispersal patterns of sediments | 175
  - Ganurgarh Shale | 176
  - Bhandar Limestone | 177
  - Sirbu Shale | 177
  - Bhandar Sandstone | 177
Environmental control on dispersal patterns 182
Provenance ... ... 184

CHAPTER VI - CONCLUSIONS 189

REFERENCES 196

APPENDIX I - Thickness data of cross-stratification units from Bhandar Group i
APPENDIX II - Inclination data of cross-stratification foresets from Bhandar Group ii - iii
APPENDIX III - Average wave length, amplitude and ripple index of ripple marks from Bhandar Group iv
APPENDIX IV - Grain size frequency distribution (number per cent) of Bhandar Group sandstones v
APPENDIX V - Statistical parameters of grain size distribution of Bhandar Group sandstones vi
APPENDIX VI - Directional data: cross-stratification azimuths from Bhandar Group vii - xviii
APPENDIX VII - Directional data: ripple trend and ripple asymmetry azimuths from Bhandar Group xix - xxii
APPENDIX VIII - Directional data: average parting lineation azimuths from Bhandar Group xxiii
APPENDIX IX - Directional data: azimuths of miscellaneous directionals from Bhandar Group xxiv
