ACKNOWLEDGEMENTS

My journey has taken many tides, but blessings of Almighty Allah made it possible and I am so much grateful to Him for giving me all the strength to finish this work.

My supervisor Prof. Mohammad Afzal is the man who taught me many things at appropriate moments during my PhD and his valuable suggestions and able guidance inspired me to finish and compile my work and eventually pen down my thesis. He is so simple and kind in nature. He always boosts and supports me during hard times and his tireless help was amazing. I am so much thankful to him for all these contributions. He has given me a new horizon of scientific sight.

I am very grateful to Prof. Absar Mustafa Khan, Chairman, Department of Zoology, Aligarh Muslim University, Aligarh, for his strong support toward compilation of the thesis and kind action to help me submit the thesis in time. Without his support, encouragement and enthusiasm, my work would never have seen the compilation in the present form. The alma mater where I started my career has been my source of inspiration and I fully endorse its contribution toward my career.

I am very much fortunate to have found a great guide and nice person in the form of Prof. Subrata Sinha. He is my co-supervisor and contributed beyond expectation for the compilation of my PhD thesis. He taught most of the basic molecular biology techniques and gave many ideas for pursuing good biomedical research. Even he has given many clues during difficult times for my experiments. I was in constant touch with him during my two-year stay in Spain and queried about many experimental problems. I cannot imagine detaching myself from him even after my PhD because he has sown the seed of science in my soul.

Now, I would like to say a big thanks to Prof. Javier S Castresana, he is so kind and humble in nature. He has given me good opportunity to finish my PhD work in his laboratory in Pamplona, Spain. He has not only given me innovative suggestions during my research work but also interacted as a best friend. He has given me freedom to think and apply mind for all kinds of troubles during experiments. He was always ready for any kind of help during my stay in Spain. I cannot forget his valuable and elegant approach for scientific implication.

Now, I would like to acknowledge Dr. Parthoprasad Chattopadhyay for his valuable suggestions and interaction during my PhD thesis writing. Dr. Kunzanag, Dr. Tapasya, Dr. Preeti, Dr. Deepti, Dr. Biplab, Dr. Matin, Dr. Sachin and Dr. Ashutosh deserve special thanks as not only seniors but also for always treating me as a younger brother. I really enjoyed my molecular biology training under Dr. Tapaysa and Dr. Matin as both of them gave me freedom to learn and taught me calmly. I really enjoyed the company of Puja, Dr. Arnab, Dr. Mohit, and Dr. Vishal. I had very constructive interaction with Miss Puja and she has helped me a lot during the starting period of my research work. After a year of my research work, I met Yushra appi, at AIIMS. She is very kind in nature and most of the time she assists me for any queries of either science or other issues.
My sincere thanks to Dr. Paula Lacoz for teaching me tissue culture technique and other experiments during my stay in Spain. She supported me in accomplishing experiments during my stay in Pamplona, Spain.

I really appreciate the help of Aiala during my stay in Spain; she has taught me Real Time RT-PCR and other techniques. She was so kind to take time out for me even in her hectic schedule.

Monica, Jana and Paula Schiaparelli deserve warm thanks and acknowledgments. They were not only my lab colleagues in Spain, but also good friends as we have had many interactions on topics ranging from scientific to social. We had many parties and other social gatherings. It would have been very difficult to finish my PhD work without their good company and assistance.

I also say thanks to Miguel, Izaskun, Aiwan and Tora for their experimental assistance and social interactions.

I cannot do without mentioning my colleagues Shabbir, Sanjay, Tanveer, Yasir, Akif, Saif, Faisal, Chinnes, Manish, Mayank, Ijaj, who always shared my problems and gave a strong backup in finishing my thesis work. Tanveer deserves special thanks for doing my official work during my stay in Spain and Delhi.

My juniors Prerena Das, Mukes, Durga, Prerena Jha, Kushboo, Bhawana, Jyant, Predeep, Ekta, Mohita, Imran, Anand and Raismi are wonderful. We have shared many good moments and thanks for keeping a suitable work atmosphere most of the time in the lab. I really appreciate and extend my special thanks to my junior Miss Bhawana. She is good in nature and has lots of common sense. She assisted me many times during my PhD.

I am immensely thankful to my parents, brothers, and sister for their indispensable emotional support during this period. My eldest brother Kamil Hayat has given me strong confidence and support, which has kept off all kinds of anxieties during my thesis work.

I am so much thankful to Mathura Ji, Satish, Rajesh, Danveer, Darshana and Ajay for their constant help during this period.

I am also thankful to CSIR, AECI and ICMR for providing fund during completion of my PhD work.
