I am deeply indebted to Professor M. Shama Jairajpuri who trained me in Nematology and supervised my research work for the Ph.D. degree. Without his constant help and encouragement it would have been difficult for me to prepare this thesis. Sincere thanks are also due to Professor A. Cooman, Rijksuniversiteit, Gent for his supervision and collaboration in research work during the period I was in Belgium.

I am grateful to Professor Ather H. Siddiqi, Chairman, Department of Zoology, Aligarh Muslim University and Dr. B.S. Lamka, Director, Zoological Survey of India, Calcutta for providing research facilities.

The collaboration in some research papers by Drs. S. Bagri, A. Van der Helden, S. Ahmad, A. Jana, S. Khore, N. Ahmad, P.K. Das, Mrs. S. Day, Miss R. Bakshi, Miss B. Sinha and Mr. S. Chosh is also gratefully acknowledged.

I shall be failing in my duties if I do not thank Drs. Irfan Ahmad, Wasim Ahmad, A.L. Bilgrami, Mr. Tariq M. Khan, Miss Samina Shafqat, Mrs. Qudat Tehsin and Mr. Haved Sabir of the Nematology Research Laboratory at AMU Aligarh, who rendered valuable help and support during the preparation of the present work.
