List of figures

Figure 1.1 Anatomy of the tooth 3
Figure 1.2 Dental caries experience of 12 year old children according to the WHO regional office 5
Figure 1.3 Developmental stages of dental caries 9
Figure 1.4 Arrangement and shape of S. mutans 13
Figure 1.5 Schematic representation of different regions of Agl/II of S. mutans 16
Figure 1.6 Stages leading to colonization and infection of S. mutans on tooth surfaces 22
Figure 1.7 An ideal approach for the control of dental caries 35
Figure 3.1 Effect of varying concentration of crude extract of M. alba 67
Figure 3.2 Representative 2% agarose-gel of PCR product 68
Figure 3.3 Effect of varying concentration of crude extract of M. alba on the different clinical isolates of S. mutans 69
Figure 3.4 Effect of the crude extract of M. alba on the glass-dependent adherence by S. mutans in the absence and presence of 5% sucrose 72
Figure 3.5 Biofilm formation on a polystyrene plate by S. mutans in the presence of purified compound 74
Figure 3.6 Standard plot of protein with known concentration of BSA 76
Figure 3.7 Standard plot of carbohydrate estimation with known concentration of glucose 77
Figure 3.8 Mass spectra of the compound purified from M. alba 79
Figure 3.9 The H1 NMR spectra of purified compound from M. alba 81
Figure 3.10 The IR spectra of the purified compound from M. alba 82
Figure 3.11 Confocal images of biofilm of S. mutans in absence and presence of DNJ 84
Figure 3.12 Chemical structure of 1-Deoxynojirimycin 88
Figure 4.1 Plot showing the effect of the lectins on the adherence of S. mutans 95
Figure 4.2 Time-dependent effect of plant lectins on the biofilm formation of S. mutans 96
Figure 4.3 Confocal laser scanning microscopy of *S. mutans* adhered to the saliva-coated coverslips

Figure 4.4 Scanning electron microscopy of *S. mutans* adhered to the saliva-coated coverslips

Figure 5.1 Initial adherence of sucrose-independent mutants on saliva-coated polystyrene surfaces

Figure 5.2 CLSM of the parent and mutant strains

Figure 5.3 Scanning electron micrographs of parent strain and sucrose-dependent mutants of *S. mutans*

Figure 5.4 SDS-PAGE of total cellular protein

Figure 5.5 Plot of relative mobility of proteins on the gel

Figure 5.6 Direct binding ELISA of total protein from parent strain mutants against polyclonal antibody of AglII

Figure 5.7 Western-blot analysis of AglII in parent strain

Figure 5.8 2D gel electrophoresis of total protein from parent strain

Figure 5.9 2D gel electrophoresis of total protein from mutant BSM3

Figure 5.10 2D gel electrophoresis of total protein from mutant BSM5

Figure 5.11 2D gel electrophoresis of total protein from mutant BSM61

Figure 5.12 Synthetic fused image showing 5 folds or more upregulated and downregulated proteins
