LIST OF ILLUSTRATIONS

CHAPTER ONE

Fig 1.1 The districts of Maharashtra inhabited by the Indian grey wolf 6

CHAPTER TWO

Fig 2.1 Bustard Sanctuary of Maharashtra 12
Fig 2.2 Meteriological data recorded at the G.I.B sanctuary, Nannaj 17
Fig 2.3 Sucession in *Sechima* - *Dicanthium* cover 20
Fig 2.4 The Great Indian Bustard Sanctuary, Nannaj (Solapur) 21

CHAPTER FOUR

Fig 4.1 Fully grown Blackbuck of M3 and M1 age classes 36
Fig 4.2 Territorial males (M1 and M2) are usually killed by wolves than any other class of blackbuck 36
Fig 4.3 Seasonal variation in density of Blackbuck in protected plots during 1992 39
Fig 4.4 seasonal variation in density of Blackbuck in protected plots during 1993 41
Fig 4.5 Seasonal variation in density of Blackbuck in grazing land during 1992 39
Fig 4.6 Seasonal variation in the density of Blackbuck in grazing land during 1993 41

CHAPTER FIVE

Fig 5.1 Distribution of Indian grey wolf in the subdivisions of Sholapur 55

CHAPTER SIX

Fig 6.0 Observation hut from where wolves were observed at water in Shambar (S1) and Mardi (M1) plots, arrow pointing out the hut 66
Fig 6.1 Plot of habitat variables on Principle component Axis 1 and 2
Fig 6.2 Plot of habitat variables on Principle component Axis 1 and 3
Fig 6.3 Study site showing waterholes, rendezvous sites and dens used by wolves
Fig 6.4 Use of rendezvous sites by wolves (1992)
Fig 6.5 Use of rendezvous sites by wolves (1994)
Fig 6.6. Alpha male lying up at a resting site
Fig 6.7 Artificial waterhole usually frequented by wolves

CHAPTER SEVEN

Fig 7.1 Blackbuck kill which has been eaten by dogs haphazardly
Fig 7.2a Wolves usually consume viscera first by removing the digestive tract of Blackbuck
Fig 7.2b Blackbuck consumed by the wolves completely
Fig. 7.3 Snares with nooses used by farmers to kill Blackbucks
Fig. 7.4 The Blackbucks are injured after escaping from snares and fall prey to wolves. here the arrow pointing out a deep cut in the hind limb of a male Blackbuck
Fig 7.5 Regression of biomass consumed by wolves on kill-interval
Fig 7.6 Composition of the wolf prey species during 1991 -1992
Fig 7.7 Wolf predation on Blackbuck and livestock (goats and sheep) during 1991-1992
Fig 7.8 Wolf predation in Blackbuck and livestock (1991-1992)
Fig 7.9 Wolf predation on Blackbuck and livestock (1993- 1994)
Fig 7.10 Spatial distribution of Blackbuck killed by wolves in the Great Indian Bustard Sanctuary at Nannaj between July 1991 and August 1994. Numbers represent the animals located at the same site
Fig 7.11 Frequency of occurrence of balckbuck kills of different distance intervals (1991-1994)
CHAPTER EIGHT

Fig 8.1 Distribution of livestock kills by wolves between July 1991 and August 1994. Numbers represent the animals attacked simultaneously

Fig 8.2 Occurrence of livestock kills at different distance intervals

Fig 8.3 Occurrence of livestock kills and their distance from the nearest vegetation

CHAPTER NINE

Fig 9.1 Den #1 in the Reinforced concrete cement pipe used during 1991-1992

Fig 9.2 Den #2 located in the grassland plot during 1993-1994

Fig 9.3 Den #3 located on the ridge of a percolated tank during 1993-1994

Fig 9.4 Den #5 located adjacent to the trench cum mound wall of a grassland plot during 1993-1994

Fig 9.5 Alpha male charging near a rendezvous site

Fig 9.6 Schematic representation of the life history of the Indian Grey Wolf in the Great Indian Sanctuary, Nannaj

CHAPTER TEN

Fig 10.1 A stay dog feeding on Blackbuck fawn

Fig 10.2 An R.C.C. pipe placed in an open area by the sanctuary managers

Fig 10.3 A juvenile wolf killed in Pratapgarh district (Uttar Pradesh) in 1996

Fig 10.4 Habitat Destruction due to quarrying around the Sanctuary
