By studying and implementing basic operations and concepts, social, ethical, and human issues, technology productivity tools, technology problem-solving and decision-making tools, the educational institutions will be able to:

** Develop a system under which financial assistance could be made available from funds in the form of loan to all the meritorious students as well as to those who would otherwise be deprived of higher education due to income constraints needs to be devised and implemented.

** Formulating mechanisms to raise resources from non-traditional sources such as industries and other commercial concerns, which are making use of highly qualified and trained manpower produced by these educational institutions.

** The internal revenue generation from industries and other business establishments can be raised by introducing courses of studies and training as per needs of the industries for increasing productivity and undertaking consultancy and research projects.

** Implementing necessary changes in rules and financial regulations to enable all the educational institutions to retain the additional funds so raised and use them for their development schemes. The recent decision of Government of India to grant 100% tax exemptions to industries for donations made to educational institutes to substantially augment their resources should be utilized fully.
** Implementing a scheme under which financial assistance could be made available from public funds in the form of educational loan to all the meritorious students as well as to those who would otherwise be deprived of higher education due to income constrains.

** Establishing an Alumni Association to get large amount of funds from former students. This practice of fund raising is successfully most of the Indian Institutes of Technology (IITs), Indian Institutes of Management (IIMs), engineering and other professional institutes in the country.

** Developing mechanisms to encourage Central Government to liberalize the existing procedures to facilitate the inflow of foreign funds.

** Increasing the prices of some services such as application forms, enrolment forms, handbooks of information, certificates, etc.

** Developing mechanisms wherein educational institutions can rent their premises on rent for social and public functions.
