Chapter - 10

** Future Scope Of Present Study **

** The proposed study is covering only Secondary schools and Junior college level education. The same can be extended for higher and technical educational institutions. 

**Presently the optimum utilization of available resources is very negligible, hence, there is a good scope for further study. 

** Considering the globalization and competitiveness of the Indian economy, it becomes evident to offer world-class education to Indian students. Hence, present study can be a guideline for offering quality education. 

** Various avenues for resources generation are recommended herewith. These can be implemented by conducting further research in the field. 

** Majority of Principals / Head Masters/ teachers are not having computer exposure and awareness. Hence, qualifications like MSCIT, Advanced Diploma courses in Information Technology can be made compulsory for academicians and its impact on quality of teaching learning process can be analyzed in further studies.
