ACKNOWLEDGEMENT

This thesis on "Pricing System in Public Enterprises of India With Special Reference to Iron and Steel Industry" was undertaken by me seven years ago in addition to the teaching assignment in the Department as Lecturer of Commerce. It would have never seen the light of the day had Professor Q.H. Farooquee, U.C.G.'s. National Lecturer, Fulbright Senior Research Fellow, Visiting Professor to U.S.A., First Dean of the Faculty for more than one-and-a-half decades and the Head of the Department of Commerce, A.M.U. Aligarh, not supervised the research work in spite of his innumerable academic and administrative preoccupations.

I also owe a debt of gratitude to the departed soul of Dr. S. Irshad Ali, Reader in Business Administration, for initial inspiration to me to work on the problem.

I am thankful to all the academicians, scholars, authors, business executives and Government officials who enriched my views through their writings, granted me interviews, furnished the reading material on the subject and answered my queries. They are so many
that it is difficult for me to thank them all by name. However, I cannot forgive myself if I fail to mention the names of Professor Ishrat Husain Farooqui (Dean, Faculty of Commerce, A.M.U. Aligarh), Dr. M. Haseeb of the Reserve Bank of India, Mr. Abdul Wadud (Formerly, Chairman of the Steel Authority of India), Dr. V.G. Kesrey (Editor, Lok Udyog), Mr. Ishrat Husain (Deputy Librarian at the Maulana Azad Library), Mr. Hafizullah of the Department's Library, esteemed colleagues and the research scholars in the Department.

I am thankful to the University for all the facilities extended to me in the course of the present work.

HOLID. ASIF ALI KHAN
