# Table of Contents

## Chapter 1  Scope of Research

1.1 Introduction ................................................. 1  
1.2 Housing situation; issues and concerns ......................... 2  
  1.2.1 India .................................................. 3  
  1.2.2 Kerala .................................................. 4  
1.3 Significance of housing in sustainable development ......... 7  
1.4 Research objectives ............................................ 8  
1.5 Research questions ............................................. 9  
1.6 Methodology and chapter scheme ................................ 9  

Appendix 1.1 ...................................................... 13  
Appendix 1.2 ...................................................... 14  
Appendix 1.3 ...................................................... 15

## Chapter 2  Sustainable-Affordable Housing:  
A Framework for conceptualization

2.1 Introduction ................................................... 17  
2.2 Sustainable-Affordable Housing ................................. 17  
2.3 Objectives of sustainable-affordable housing ................. 23  
  2.3.1 Socio-cultural sustainability ............................ 24  
  2.3.2 Economic sustainability or Affordability ............... 26  
  2.3.3 Technological sustainability ............................ 28  
  2.3.4 Environmental sustainability ............................ 29  
2.4 The conceptual framework for sustainable-affordable housing 34  
2.5 Conclusion .................................................... 35

## Chapter 3  Public Housing policy in Kerala:  
History and Evaluation

3.1 Introduction ................................................... 37  
3.2 Evolution of housing policy ..................................... 37  
  3.2.1 Developing countries .................................... 38  
  3.2.2 Housing policy: India .................................... 41  
  3.2.3 Housing policy: Kerala .................................... 49  
3.3 Evaluation of public housing schemes : Kerala ............... 54
3.3.1 Scheme selection and peculiarities 54
3.3.1.1 One Lakh Housing Scheme (OLHS) 55
3.3.1.2 Indira Awaas Yojana (IAY) 56
3.3.1.3 Total Housing Scheme (THS) 57
3.3.2 Sustainability analysis for selected schemes 58

3.4 Conclusion 62

Appendix 3.1 64
Appendix 3.2 65

Chapter 4 Public Housing Policy in Kerala: Evaluation of Household surveys and Case studies

4.1 Introduction 69
4.2 Household survey and case studies 69
  4.2.1 Case studies from One Lakh Housing Scheme 71
  4.2.2 Case studies from Indira Awaas Yojana 73
  4.2.3 Case studies from Total Housing Scheme 76
  4.2.4 Conclusions from the field research 79
4.3 Analysis III (From the perspective of households) 81
  4.3.1 Comparison of different aspects of sustainability between the schemes 81
  4.3.2 Correlation between different aspects of sustainability within the schemes 84
  4.3.3 Correlation between different aspects of sustainability between the schemes 88
  4.3.4 Comparison of total sustainability among the schemes 90
  4.3.5 Conclusions from the statistical analysis 90
4.4 Examples of housing programmes from other countries 91
  4.4.1 The People's Housing Process (PHP), South Africa 91
  4.4.2 The Grameen Bank (GB) low-cost housing programme, Bangladesh 94
  4.4.3 Million Houses Programme (MHP), Sri Lanka 96
4.5 Discussions and Evaluation 98
  4.5.1 Socio-cultural Sustainability 98
  4.5.2 Economic sustainability or Affordability 100
  4.5.3 Technological sustainability 103
  4.5.4 Environmental sustainability 105
4.6 Strategies for sustainable-affordable housing in Kerala 107
Table of contents

4.6.1 Policy measures for socio-cultural sustainability (PSCS) 108
4.6.2 Policy measures for economic sustainability or affordability (PES) 109
4.6.3 Policy measures for technological sustainability (PTS) 110
4.6.4 Policy measures for environmental sustainability (PEVS) 111

4.7 Conclusion 111

Appendix 4.1 112
Appendix 4.2 123

Chapter 5 Evaluation of Technology Options: Kerala

5.1 Introduction 127

5.2 Evolution of the present building process: Kerala 127
5.2.1 Traditional building process 128
5.2.2 Modernisation of the building process 128
5.2.3 Emergence of Cost Effective and Environmentally Friendly (CEEF) technology 130
5.2.3.1 Centre of Science and Technology for Rural Development (COSTFORD) 130
5.2.3.2 Nirmithi Kendra 130

5.3 Popular building alternatives in Kerala 133
5.3.1 Foundation and basement 133
5.3.2 Walling or superstructure 134
5.3.3 Roofing 136
5.3.4 Sustainable utilization of waste materials for building process 139

5.4 Selection of building alternatives 141
5.4.1 Comprehensive analysis based on the conceptual framework 141
5.4.2 Grading of building components based on embodied energy 145

5.5 Sustainable alternatives; specific considerations in the context of Kerala 149
5.5.1 Choice of sustainable technology options 150
5.5.2 Sustainability analysis for new technology options 151

5.6 Conclusion 153
Chapter 6  Rice Husk Ash Pozzolana

6.1 Introduction 165
6.2 Literature review 167
6.3 Laboratory research 169
   6.3.1 Rice husk ash sample preparation 169
   6.3.2 Experimental methods 169
   6.3.2.1 Chemical analysis for loss on ignition and total silica 169
   6.3.2.2 Soluble fraction of silica 170
   6.3.2.3 Pozzolanic activity 170
   6.3.2.4 X-ray diffraction (XRD) analysis 170
   6.3.2.5 Microscopic analysis 170
   6.3.2.6 $^{29}$Si Magnetic Angle Spinning (MAS), Nuclear Magnetic Resonance (NMR) on RHA 170
   6.3.3 Results and discussion 171
   6.3.3.1 Chemical analysis 171
   6.3.3.2 Pozzolanic activity 172
   6.3.3.3 XRD analysis 173
   6.3.3.4 Microscopic analysis 176
   6.3.3.5 $^{29}$Si MAS NMR 177
6.4 Field research: Investigation on performance of field ovens 181
   6.4.1 Types of field ovens 181
   6.4.2 Experimental methods 184
   6.4.2.1 Chemical analysis for loss on ignition and soluble fraction of silica 184
   6.4.2.2 Pozzolanic activity 185
   6.4.2.3 XRD analysis 186
   6.4.2.4 Particle size analysis 187
   6.4.2.5 Determination of specific surface area 188
   6.4.2.6 Lime reactivity test 189
   6.4.2.7 Long term compressive strength 190
   6.4.3 Results and Discussion 192
   6.4.3.1 Chemical analysis 192
   6.4.3.2 Pozzolanic activity 193
   6.4.3.3 XRD analysis 195
   6.4.3.4 Particle size analysis 195
Table of contents

6.4.3.5 BET analysis for surface area 196
6.4.3.6 Lime reactivity and compressive strength 197
6.5 Conclusions 198

Appendix 6.1 201

Chapter 7 Conclusions and Recommendations
7.1 Introduction 203
7.2 Achievements of this research 203
7.2.1 The conceptual framework 203
7.2.2 Application of the conceptual framework in the evaluation of housing schemes in Kerala 205
7.2.3 Application of the conceptual framework in the evaluation of present building process in Kerala 209
7.2.4 Rice husk ash pozzolana as a partial replacement for cement 210
7.2.5 Conclusion and reflection 211
7.3 Recommendations for implementation 212
7.4 Scope for further research 213
