ACKNOWLEDGMENTS

I wish to record my sincerest sense of gratitude to my Supervisor Mr. Mahmood Alam Raz, Reader, Department of Economics, Aligarh Muslim University, Aligarh, for his close supervision, inspiring guidance, constant encouragement and continuous help throughout the period of this study. But for his unstinted and cheerful cooperation this work could never have been completed.

My thanks are also due to Professor Mohammed Shabbir Khan, Head of the Department of Economics, AMU, Aligarh. I owe him a lot as a teacher, well-wisher, critic, etc. His ready accessibility for consultation has been a boon to me.

The Aligarh Muslim University, Aligarh, and the Indian Council of Social Science Research, New Delhi, deserve my thanks for the award of doctoral fellowships for this study. I am also grateful to Professor V.K. Pandey of the Indian Institute of Foreign Trade, New Delhi, for his valuable suggestions whenever I took the opportunity to discuss my problem with him.

My teachers and friends, particularly in the Department of Economics, AMU, Aligarh, who helped me in completing this work and to whom I owe a debt of gratitude, are too numerous to be named individually.

I am also indebted to the members of the staff of the Libraries of Indian Institute of Foreign Trade, New Delhi, National Council of Applied Economic Research, New Delhi, and Maulana Azad Library, AMU, Aligarh, for providing me with unflinching help and facilities for collection of data and other information.

Finally, I should like to thank Mr. Mashhood Alam Raz who has cheerfully typed my thesis within the shortest possible time.

ABDUL WAHAB
