ACKNOWLEDGEMENTS

The author wishes to express her deep sense of gratitude to Dr. Abdul Aleem Khan, Reader in Sunni Theology for his able guidance and supervision during the progress of this work. His kind help and advice was indeed a pillar of strength in the writing of this thesis. Her Co-Supervisor, Professor M.M.R.K. Afridi, gave all help in the interpretation of scientific ideas and for this the author is highly indebted to him.

This research work was started at the suggestion of late Professor Mohd. Rizwanullah, then Chairman, Department of Sunni Theology and it is indeed sad to record that he is no more with us to see its completion. While being grateful to him, the author prays to the Almighty Allah that his soul may rest in peace /Amin/.

The author wishes to express her thanks to Mr. Ashfaqur Rehman for the typing of the Arabic text.

The help and encouragement received from Professor Mohd. Taqi Amini Sahib, Moulana Mohd. Asadullah and other members of the Theology Department is also gratefully acknowledged.

Lastly, the author wishes to thank her husband, Professor Nawab Hasan Khan for his help in finding biological explanations for the teaching of the 'Holy Quran' and the 'Sunnah'.
