ACKNOWLEDGEMENT

Paucity of words makes it difficult for me to express my sincere thanks and deep sense of gratitude towards my respected guide DR.(MRS.) S.CHANDWANI, Professor and Head, Department of Physiology, Medical College, Baroda. It is due to her constant guidance, constructive criticism, scientific approach and personal interest that I have been able to complete this work. At every turn, her critical and ever discerning eye picked out errors and kept the work going within the narrow confines of quality on one side and feasibility on the other. It is because of her invaluable inspiration and guidance and the great latitude of freedom in planning and execution of my work, that this study has seen the light of the day.

I take it as a privilege and duty to express my reverence to DR.G.N.SHUKLA, Professor and Head, Department of Surgery, whose innate innovativeness led me to choose this study. His invaluable advice and sustained interest enlightened my difficult path and made this study a success. For me, besides being a teacher, he has been a philosopher and a preacher and whatever I have learnt from him shall forever remain etched on my mind. I bow my head with deep sense of gratitude and indebtedness.

I express my sincere gratitude to the Dean, Medical College, Baroda and the Superintendent, S.S.G.Hospital, Baroda for permitting me to use all the facilities.

I am glad to acknowledge my indebtedness to DR.M. RAJAPURKAR, Director and Mr.Suresh Koge, Chief Biochemist, Muljibhai Patel Society for Research in Nephro-Urology, Nadiad, for providing rich source of information, guidance and technical help in biochemical methods. Without the necessary valuable data made available by them, this study could not have been a reality.
My humble thanks are due to **Dr.(Mrs.) G.K. HATHI**, Head, Department of Physiology, Faculty of Medicine for the inspiration and encouragement during my study.

I was most fortunate in securing able assistance of **Dr. P.V. KOTECHA**, Associate Professor and **Dr. DIVYANG SHAH** Department of Preventive and Social Medicine for their most invaluable help to carry out statistical analysis.

I am glad to acknowledge my indebtedness to all teachers and resident doctors of the Department of Surgery, S.S.G. Hospital, for their help and cooperation.

My special thanks are due to all my colleagues and friends who have helped me directly or indirectly in successfully completing my work.

I am at a loss to find suitable words of appreciation for **Mr. NAGARKAR** and **Mr. JAYANTIBHAI** for neat typing and computer work.

I can never forget my patients, who will probably never know their pivotal role in this study, who imparted knowledge inspite of their sufferings - a debt, I cannot ever repay.

*Dr. TRIVEDI*
