ACKNOWLEDGEMENTS

I express my sincere gratitude to Prof. T.R. Joshi, Head, Applied Physics Department, Faculty of Technology and Engineering, M.S. University, Baroda for his advice, and constant encouragement throughout the present investigation.

In this regard the keen interest taken in the progress of the work and valuable discussions by Prof. R.V. Joshi (Emeritus Professor and former Head, Applied Physics Department) are greatly acknowledged with sincere thanks.

Thanks are due to Prof. S.J. Desai and Prof. M.P. Patel, Department of Geology, Faculty of Science, M.S. University of Baroda and Prof. M.S. Joshi (Emeritus Professor) S.P. University, Vidyanagar, for their help in collecting the natural zeolites from different parts of western India.

Thanks are also due to Dr. K.S.V. Nambi (BARC) Dr. R.P. Rao (CECRI, Karaikudi) Dr. S.P. Kathuria (BARC) Prof. K.R. Rao (IIT Kharagpur) Prof. B.P. Chandra (R.D. Uni. Jabalpur) and Dr. R.K. Gartia (Manipur Uni. Imphal) whom the author held discussions at CECRI Conference on Luminescence, which was held during 12-14th Jan. 1980 at Karaikudi, India, regarding the proposed model of Phase Change Thermoluminescence.

Thanks to my colleagues Dr. A.K. Nehate Dr. M. Srinivas and Mr. D.R. Joshi for friendly co-operation. I extend my thanks to Prof. V.N. Potbhare and Miss. Neera Tressler for providing the computer facilities.
Finally the author recalls his deep sense of gratitude to his parents Sri. Kota Rama Rao and Smt. Parvathi who have been a constant source of inspiration for this work.

Lastly, my sincere thanks to Department of Science and Technology, New Delhi, for providing me with research scholarship.

Baroda

K. V. R. Murthy 19/4/90
