ACKNOWLEDGEMENT

A project like this, naturally, cannot fructify without immense help from a lot of people. Needless to say, without Prin. Dr. G. M. Talhar unwavering support. I would simply not have had a ringside view of this learning experience. His unstinting support for this project, for guiding me to information sources and for sharing his encyclopedic knowledge, was remarkable.

I, the undersigned take the quintessence of pleasure in submitting his project work to Tilak Maharashtra University, Pune. Research cannot be conducted in vacuum. One has to depend upon a number of people and learning resources.

Many people helped me at different stages of my work. I owe a great deal to them at this moment. It is not possible to mention all of them. Surely, I would fail in my duty, if I do not cite the names of those whom owe my indebtedness, Specially, Dr. N.C Joshi, Founder Director of Institute of Science, Pune.

My loving thanks to Prin. Dr. G. M. Talhar, my supervisor, a man not only talented but equally inspiring. His ideas, stories and reading of every word with always

iv
helpful suggestions made this project sing. This project wouldn’t have been the same without him.

My indebtedness to the hon. Director, dept. of Management, all the professors, head of department, librarian and staff of the Tilak Maharashtra University, Pune for all the involvement and help rendered to me during the period of completion of the project work.

My special thanks to the Director, National Council for Research and Training, New Delhi, Director, National Institute of Technical Teachers Training and Research Chandigarh and Bhopal, Director Centre For Advanced Studies in Education Baroda, for their valuable support and cooperation.

My sincere thanks to the authors of burnout Inventory and job satisfaction scale, which were used by me for the study. My gratitude, to all the teachers of the unaided engineering colleges and polytechnics of Jalgaon district, selected for study, for their support during data collection.

Commitment to quality is a rare virtue. Mr. Rishabh Shukla, B.Tech, (Chemical Engg) of UDCT, North Maharashtra University, Jalgaon for the care, concern and efforts, he extended to make this report qualitative.
I would be remiss in not acknowledging my debt to my family. To all of my loving and supportive family—big hugs of thanks especially to my parents Shri Narmadashankar Shukla and Smt. Mankarni Shukla and wife Kiran and wonderful children Rishabh and Vedanta for their unparallel integrity. And, of course, a heartiest thanks to my brother Rishi Shukla and his wife Savita Shukla, from the bottom of my heart for their constant support and encouragement.

Last but not the least, to all my well-wishers, I express a deep sense of indebtedness, particularly, Prof. Dr. Dagade, Librarian and Prof. Dr. S.S. Shimpi, IBMR, Pune.

At the end of the day, I alone remain responsible for the errors, inadequacies and shortcomings that doubtless survive my best efforts.

Date: 31/7/11

Place: Pune

(Ravindra N. Shukla)
