ACKNOWLEDGEMENTS

It is a pleasure to express my deep sense of gratitude and indebtedness to Prof. J.C. George, Department of Zoology, University of Guelph, Guelph, Ontario, Canada, for the suggestion of the problem and constant encouragement throughout the course of studies but for which this thesis would not have been in the present condition.

I am grateful to Dr. A.R. Gopala Iyengar, Director, Biology division, Bhabha Atomic Research Centre, Bombay, India and also to Dr. Jacob Eapen of the same division for providing all the facilities to carry out the autoradiographic experiments at the Biology division, Bhabha Atomic Research Centre, Bombay.

With extreme happiness I extend my sincere thanks to Prof. R.V. Shah, Head, Department of Zoology, Faculty of Science, M.S. University, Baroda, India whose kind help and suggestions proved invaluable. My sincere thanks are also due to Dr. K.S.S. Nair for going through the manuscripts and for his constructive criticisms and suggestions. I am thankful to Dr. Bonny Pilo for rendering all the possible assistances in the preparation of this thesis. I also wish to thank all my colleagues and friends in the Department for the various helps rendered to me during the course of my studies.

I am indebted to the University Grants Commission for the award of the research scholarship during the tenure of which I carried out the present work.
