

List of Figures

Figure No.	Title	Page No.
1.	Mechanism of normal and abnormal connective tissue production. TIMP, tissue inhibitor of matrix metalloproteinases.	13
2.	Activation of hepatic stellate cells in Fibrogenesis. Myofibroblasts probably also produce inhibitors of collagenases, enhancing Fibrogenesis.	14
3.	Role of AST and ALT in enzymatic reduction of Alanine and Aspartic acid	18
4.	Diagrammatic summary of the endosome/lysosome system, with special reference to the biogenesis of lysosomes	23
5.	Cell Digestion and the Secretory Pathway	24
6.	Autophagy	26
7.	Hydroxylation and Conjugation Reaction	29
8.	Mechanism of Cell injury by CCl ₄ and Paracetamol.	29
9.	Formation of free radicals from carbon tetrachloride	30
10.	Sequence of hepatotoxic effects following lipid peroxidation induced by free radicals formed in carbon tetrachloride metabolism	31
11.	Physiology of growth hormone	37
12.	CCl ₄ Vapour Induction Chamber	51
13.	Figure showing β -glucuronidase (liver free) activity	80
14.	Figure showing β -glucuronidase (liver total) activity	81
15.	β -glucuronidase (serum) activity	82
16.	Figure showing N-acetyl glucosaminidase (liver free) activity	83
17.	Figure showing N-acetyl glucosaminidase (liver total) activity	84
18.	Figure showing N-acetyl glucosaminidase (serum) activity	85
19.	Figure showing Acid phosphatase (liver free) activity	86
20.	Figure showing Acid phosphatase (liver total) activity	87

Figure No.	Title	Page No.
21.	Figure showing Acid phosphatase (serum) activity	88
22.	Figure showing Alanine aminotransferase (ALT/SGPT) activity	89
23.	Figure showing Aspartate aminotransferase (AST/SGOT) activity	90
24.	Figure showing Serum alkaline phosphatase (SALP) activity	91
25.	Figure showing Serum bilirubin (SRBN) activity	92
26.	Figure showing Total protein activity (g%)	93
27.	Figure showing Estimation of Adrenaline (ng/ml)	94
28.	Figure showing Estimation of Nor-adrenaline (ng/ml)	95
29.	Figure showing Estimation of Growth Hormone (ng/ml)	96
30.	Figure showing beta glucuronidase- Total/ free enzyme activity (ratio) after 2 weeks (mg/kg)	97
31.	N acetyl Glucosaminidase Total/ free enzyme activity (ratio) after 2 weeks (mg/kg)	98
32.	Acid phosphatase- Total/ free enzyme activity (ratio) after 2 weeks (mg/kg)	99
33.	Figure showing beta glucuronidase- Total/ free enzyme activity (ratio) after 6 weeks (mg/kg)	100
34.	N acetyl Glucosaminidase Total/ free enzyme activity (ratio) after 6 weeks (mg/kg)	101
35.	Acid phosphatase- Total/ free enzyme activity (ratio) after 6 weeks (mg/kg)	102
36.	Figure showing beta glucuronidase- Total/ free enzyme activity (ratio) after 12 weeks (mg/kg)	103
37.	N acetyl Glucosaminidase Total/ free enzyme activity (ratio) after 12 weeks (mg/kg)	104
38.	Acid phosphatase- Total/ free enzyme activity (ratio) after 12 weeks (mg/kg)	105
