

LIST OF TABLES

Table No.	Title	Page No.
1	Distribution of the respondents according to slums, place of origin and year of migration	115
2	Statewise distribution of the respondents according to urban slums, religion and year of migration	116
3	State-wise distribution of respondents by their age	118
4	Distribution of the respondents by their type and size of the family	121
5	Statewise distribution of the respondents by number of brothers and sisters of male –head, before migration	122
6	Distribution of the respondents' families by type of house, number of rooms and toilets	123
7	Distribution of the respondents' families by services hired by them	124
8	Distribution of the respondents' families by possession the vehicle	125
9	Distribution of the respondents' families by possession of kitchen appliances	126
10	Distribution of the respondents' families by the possession of home appliances	127
11	Distribution of the respondents' families by possession of furniture in the house	129
12	Distribution of the respondents by family income per month	130
13	Distribution of the respondents by the educational level of husband and self	133
14	Distribution of the respondents by their and their husbands' occupation	136
15	Distribution of the respondents by subscription of magazines and library and club membership	139
16	Distribution of the respondents by recreational activities	140
17	Distribution of the respondents by socio-economic status scores (Community-wise and total)	142
18	Distribution of the respondents by their contact with the place of origin	145

Table No.	Title	Page No.
19	Distribution of the respondents by the frequency with which they kept contact with their place of origin	146A
20	Distribution of the respondents by kind of transportation used by the in-migrants families	148
21	Distribution of the respondents by the extent of in-migrant families' contact with people at the place of origin	151
22	Distribution of the respondents by the reasons for keeping / not keeping contact with relatives / friends at the place of origin	152
23	Distribution of the respondents by extent of influence of social and physical factors on migration decision	154
24	Distribution of the respondents by extent of influence of demographic factors on migration decision	156
25	Distribution of the respondents by extent of influence of cultural and communication factors on migration decision	158
26	Distribution of the respondents by the extent of influence of Economic factors for migration decision	161
27	Distribution of the respondents by the extent of influences of factors of migration and their weighted mean score	165
28	Distribution of the respondents by the sources of information used by the in-migrant families for various aspects (before migration)	167
29	Distribution of the respondents by the extent of use of sources of information before migration	169
30	Distribution of the respondents by their perception of extent of economic cost of migration	172
31	Distribution of the respondents by their perception of the extent of non-economic cost of migration	175
32	Distribution of the respondents statewise by their perception of extent of economic, non-economic cost of migration	178
33	Distribution of the respondents by their perception of extent of economic benefits of migration	180

Table No.	Title	Page No.
34	Distribution of the respondents by their perception of extent of non-economic benefits of migration	182
35	Distribution of the respondents statewise by their perception of extent of economic, non-economic and total benefits of migration	184
36	Distribution of the respondents by the extent of problems (personal and psychological and time and energy management, problems) faced by in-migrant families	187
37	Distribution of the respondents by the extent of problems (money management and social problems) faced by in-migrant families	189
38	Distribution of the respondents by the extent of problems (children related, at the time of emergencies and miscellaneous problems) faced by in-migrants families	192
39	Distribution of the Respondents State-wise by their Scores on various Problems faced immediately after migration and at the time of data collection	194
40	Weighted mean score of various problems faced by in-migrant families	196
41	Mean of extent of problems faced by the in-migrant families (at the time of data collection) by selected variables	199
42	Distribution of the respondents by the extent of coping strategies they adapted for problems (personal psychological, time and energy management) they faced after migration	200A
43	Distribution of the respondents by the extent of coping strategies they adapted for problems (money management and social problems) they faced after migration	202A
44	Distribution of the respondents by the extent of coping strategies adapted by in-migrant families for (children related and miscellaneous) problems	203A
45	Distribution of the respondent statewise by the extent of various strategies adapted by in-migrant families immediately after migration and at time of data collection	205
46	Weighted mean score of various coping strategies adapted by in-migrant families	207

Table No.	Title	Page No.
47	Mean 'extent of coping strategies adapted' scores the in-migrant families (at the time of data collection) by selected variables	208
48	Distribution of the respondents by the extent of help received from various sources for different kinds of problems	210
49	Distribution of the respondent state-wise by the extent of help received from various people and organization	212
50	Distribution of the respondents by the parameters of perceived Quality of life-Financial Security - before migration and at the time of data collection	216
51	Distribution of the respondents by parameter of perceived quality of life – Food (frequency and quality), clothing (quantity, quality and adequacy)-before migration and at the time of data collection	218
52	Distribution of the respondents by a parameter of perceived quality of life – House and housing conditions- before migration and at the time of data collection	219
53	Distribution of the respondents by the parameters of perceived Quality of life-Health Facilities and communication facilities-before migration and at the time of data collection.	225
54	Distribution of the respondents by the parameters of perceived Quality of life-Community facilities-before migration and at the time of data collection	226
55	Distribution of the respondents by the parameters of perceived Quality of life- Leisure and Recreation -before migration and at the time of data collection	230
56	Distribution of the respondents by a parameter of quality of life – Psychological and Social Aspects-before migration and at the time of data collection	232
57	Distribution of the respondents by parameters of quality of life- Environmental Conditions- before migration and at the time of data collection	233
58	Distribution of the respondents community-wise, state-wise and religion-wise by the extent of perception of their quality of life before migration and at the time of data collection	235

Table No.	Title	Page No.
59	Weighted mean scores of the respondents for the perceived quality of life, at the time of data collection	235
60	Mean 'extent of coping strategies adapted' score the in-migrant families (at the time of data collection) by selected variables	238
61	Coefficient of correlation showing relationship between socio-economic status (before migration) and perceived quality of life (before migration).	240
62	Coefficient of correlation showing relationship between socio-economic status (ADC) and perceived cost and benefits of migration	241
63	Co-efficient of correlation showing relationship between extent of problems faced and selected variables	242
64	Frequency and percentage distribution of the respondents by education, income and occupation of the respondents	242
65	Analysis of Variance for the extent of problems faced by the in-migrant families (at the time of data collection)	243
66	Coefficient of correlation showing relationship between extent of coping strategies adapted and selected variables	245
67	Analysis of Variance for the extent of coping strategies adapted by the in-migrant families (at the time of data collection)	246
68	Coefficient of correlation showing relationship between quality of life (at the time of data collection) and selected variables	248
69	Analysis of Variance for the perception of Quality of Life of the in-migrant families (at the time of data collection)	249
70	Weighted mean score of various problems faced and coping strategies adapted by in-migrant families	251
