

LIST OF FIGURES

	Page No. -----
2.1 Relationships between luminescence	7
2.2 TL glow curve for LiF	9
2.3 Energy level diagram at absolute zero temperature	15
2.4 Energy level diagram for metal, semiconductor and insulator	16
3.1 Schematic drawing of the structure of the Sun	22
3.2 Spectral irradiance of the Sun	24
3.3 Sun-earth geometrical relationship	25
3.4 Position of earth with respect to sun at solstices and equinoxes	27
3.5 Summer and winter solstice	27
3.6 Solar path for one day	28
3.7 Equation of time	30
3.8 Pyranometer	32
3.9 Pyrheliometer	33
3.10 Sun shine recorder	34
3.11 Flat plate collector	38
3.12 Radiation booster arrangement	41
4.1 Fundamental tetrahedral unit	49
4.2 Secondary building units	51

4.3	Isotherms for the adsorption of water in 13X powder	62
4.4	Adsorption isotherms for water vapour on zeolite 13X pellets	62
5.1	Schematic diagram of VCS	68
5.2	Vapour Absorption System	70
5.3	Components of VJS	74
5.4	Open cycle adsorption cooling system	76
5.5	Adsorption isotherm for zeolite	79
5.6	Working principle of the zeolite water refrigeration system	84
6.1	Structure of Molecular Sieve Type X	92
6.2	Zeolite pellets used in the study	94
6.3	Block diagram of TL set up	95
6.4	Photographs of TL unit	97
6.5	TL glow curve for 13X annealed upto 800 degree C	99
6.6	TL glow curve for 13X annealed at 850 degree C for one hour	101
6.7	TL glow curve for 13X annealed at 900 degree C for one hour	102
6.8	TL glow curve for 13X annealed at 1000 degree C for one hour	103
6.9	IR spectrum for fresh 13X	105
6.10	IR for 13X annealed at 900 degree C	107
6.11	IR for 13X annealed at 1000 degree C	108

6.12	Laboratory level experimental setup	110
6.13	Tube network in laboratory experiments	111
6.14	Photograph of laboratory setup	112
6.15	Photograph of ice formed	115
6.16	Temperature profile during desorption cycle	116
6.17	Temperature profile during adsorption cycle	117
6.18	Ideal cycle of zeolite refrigerator	120
6.19	Details of the collector	124
6.20	Condenser operating temperatures	127
6.21	Condenser pipe network	129
6.22	Evaporator details	132
7.1	Temperature gain during experiment with ice	136
7.2	Photograph of the zeolite refrigerator prototype	138
7.3	Ice formed in the prototype	139
7.4	Double mirror booster	141
7.5	Eight sided booster	142
7.6	Prototype with eight sided booster arrangement	143
7.7	Engineered model of the refrigerator	147
7.8	Front view of the model	148
7.9	Back view of the model	149
7.10	Cold box details	150
7.11	Temperature profile during desorption cycle	152
7.12	Temperature profile during adsorption cycle	153
7.13	Whole day temperature profile - 1	154
7.14	Whole day temperature profile - 2	155

7.15 One year performance data	156
7.16 Whole day temperature profile with load	158
7.17 One day performance data of engineered model	159
