**CH 1 1**

INTRODUCTION ........................................ 1 - 22

Education as a system ....................................
The broad aims of teaching History ....................
The objectives of teaching History ....................
The Unique Characteristics of history as a discipline
Instructional alternatives in the teaching of history
Programmed learning in teaching history
Programmed Filmstrips and their place in the industrial process
Considerations for selecting the media
Scope and limitations of the study
References ............................................

CHAPTER V EXPERIMENTATION

Description of the sample

Matching the groups

The plan of the experiment

The conduct of the experiment

CHAPTER VI ANALYSIS AND INTERPRETATION

Nature of data obtained

Preliminary treatment of data

Testing of hypotheses

1. Knowledge objective

- F test for gain in knowledge on immediate post test

- t test for gain in knowledge on immediate post test

- F test for retention of knowledge

- t test for retention of knowledge

2. Objective Understanding

- F test for gain on immediate post test for the objective understanding

- t test for gain on immediate post for the objective understanding

- F test for retention - objective understanding

- t test for retention - objective understanding
3. **Objective Application**

   - F test for immediate gain - objective Application
   - t test for immediate gain - objective application
   - F test for Retention - Objective Application
   - t test for retention - objective Application

4. **Objective Skill**

   - F test for immediate gain - objective Skill
   - t test for immediate gain - objective Skill
   - F test for Retention - Objective Skill
   - t test for retention - objective skill.

**Discussion and Findings**

**General outcomes**
