

TABLE OF CONTENTS

DECLARATION BY AUTHOR.....	i
CERTIFICATE OF GUIDE.....	ii
CERTIFICATE OF DEAN OF RESEARCH.....	iii
TABLE OF CONTENTS.....	iv-viii
ACKNOWLEDGMENTS.....	ix-xi
ABSTRACT.....	xii-xiii
ABBREVIATIONS.....	xiv-xv
LIST OF FIGURES.....	xvi-xxii
LIST OF TABLES.....	xxii
1.0 INTRODUCTION	
1.1 ZnO Nanocrystals (NCs).....	3
1.1.1 Biomedical applications of ZnO.....	5
1.1.1.1 Antibacterial applications.....	5
1.1.1.2 Cancer diagnosis and therapy.....	6
1.1.1.3 Biosensors.....	7
1.1.2 Toxicity.....	7
1.2 Graphene.....	9
1.2.1 Synthesis.....	10
1.2.2 Surface functionalization.....	11
1.2.3 Biomedical applications.....	12
1.2.3.1 Drug delivery.....	13
1.2.3.2 Nucleic acid and gene delivery.....	14
1.2.3.3 Biosensing applications.....	15
1.2.3.4 Tissue engineering.....	16
1.2.3.5 Cancer therapy.....	17
1.2.3.6 Biomedical imaging.....	17
1.2.3.7 Antibacterial applications.....	18
1.2.4 Toxicity profile of graphene.....	19
1.2.4.1 <i>In vitro</i> toxicity of graphene.....	19
1.2.4.2 <i>In vivo</i> toxicity of graphene.....	20
1.3 Thesis scope and objectives.....	23
1.3.1 Objectives of the study.....	23
1.3.2 Research Questions.....	23
1.3.2 Research Hypothesis.....	24
References.....	25

2.0 MATERIALS AND METHODS

2.1 Synthesis and physico-chemical characterization of ZnO NCs.....	40
2.1.1 Preparation of ~ 5 nm size NCs.....	40
2.1.2 Preparation of 200 nm size ZnO.....	41
2.1.3 Starch coated ZnO NCs:.....	41
2.1.4 Silica capped ZnO.....	42
2.1.5 PEGylated ZnO.....	42
2.1.6 ZnO nanorods.....	43
2.1.7 Physicochemical characterization.....	44
2.2 Synthesis and physico-chemical characterization of graphene.....	44
2.2.1 Synthesis of graphene by arc-discharge method.....	44
2.2.2 Surface functionalization:.....	44
2.2.3 Physico-chemical characterization:.....	45
2.2.4 Contact angle measurement:.....	45
2.3. Antibacterial activity studies.....	45
2.3 Cell culture experiments.....	46
2.4 ZnO NCs toxicity analysis.....	47
2.4.1 Detection of cell viability..	48
2.4.2 Detection of LDH release.....	49
2.4.3 Cytoskeletal imaging.....	50
2.4.4 Detection of intracellular ROS.....	50
2.4.4 Detection of mitochondrial superoxide.....	51
2.4.5 Assessment of mitochondrial membrane potential.....	51
2.4.7 Detection of apoptosis.....	53
2.4.8 Cell cycle analysis.....	54
2.4.9 Detection of intracellular and extra cellular Zn ²⁺ ions.....	55
2.4.10 Estimation of extracellular pH.....	55
2.4.11 Statistical analysis.....	56
2.5 Graphene toxicity analysis.....	56
2.5.1 Kidney epithelial cells (Vero) cells.....	56
2.5.1.1 Cellular uptake studies using flow cytometry.....	56
2.5.1.2 Detection of cell viability..	56
2.5.1.3 Detection of LDH release.....	57
2.5.1.4 Cytoskeletal imaging.....	57
2.5.1.5 Detection of apoptosis.....	57
2.5.1.6 Detection of intracellular ROS.....	58
2.5.2 Murine macrophage cells (RAW 264.7).....	58
2.5.2.1 Cell culture.....	58
2.5.2.2 Intracellular uptake studies.....	59
2.5.2.3 Cytoskeletal imaging.....	59

2.5.2.4	Detection of cell viability..	59
2.5.2.5	Detection of plasma membrane integrity (LDH Assay).....	60
2.5.2.6	Detection of ROS (DCFH-DA Assay).....	60
2.5.2.7	Detection of Apoptosis (Annexin V-FITC/PI Assay.....	60
2.5.3	Human primary blood cells	61
2.5.3.1	Hemolysis	61
2.5.3.2	Platelet activation and aggregation study:.....	62
2.5.3.3	Plasma coagulation studies	62
2.5.3.4	Inflammation analysis	63
2.5.3.4	Lymphocyte isolation.....	63
2.5.3.5	Lymphocyte proliferation analysis	64
2.5.4	Genotoxicity Analysis.....	64
2.5.4.2	Materials	64
2.5.4.3	Preparation of reagents.....	64
2.5.4.4	Preparation of base slides	65
2.5.4.4	Preparation of cells	65
2.5.4.4	Preparation of microgel slides	65
2.5.4.7	Electrophoresis of microgel slides for comet assay.....	66
2.5.4.8	Neutralization and staining	66
2.5.4.9	Toxicogenomic analysis using microarray.....	66
2.6	<i>In vivo</i> toxicological analysis.....	66
2.6.1	Housing of animals.....	66
2.6.2	Injection in mice and sample preparation.....	67
2.6.3	Histopathology.....	67
2.6.4	RT-PCR studies on mouse blood.....	68
2.6.5	RNA isolation Ambion kit.....	68
2.6.6	Biochemical analysis of mouse blood.....	68
References.....		69
3.0	INTERACTIONS OF ZnO NCs WITH PROKARYOTIC AND EUKARYOTIC CELLS.	
3.1	Introduction.....	72
3.2	Results and discussion.....	75
3.2.1	Characterization of ZnO NCs.....	75
3.2.2	Interaction of ZnO NCs with bacteria	79
3.2.3	Interaction of ZnO NCs with normal and cancer cells.....	82
3.2.4	Cell viability analysis.....	82
3.2.5	Role of size scale on the toxicity behavior of ZnO.....	83
3.2.6	Effect of surface modification.....	84

3.2.7	Disruption of Plasma membrane integrity.....	85
3.2.8	Effect on cell morphology	86
3.2.9	Effect on cytoskeleton.....	87
3.2.10	Intracellular ROS generation	87
3.2.11	Mitochondrial super oxide formation	89
3.2.12	Mitochondrial membrane potential.....	90
3.2.13	ZnO induce preferential apoptosis in cancer cells	92
3.2.14	Cell cycle analysis.....	93
3.2.15	Mechanism of ZnO mediated preferential toxicity	95
3.3	Conclusions.....	98
	References.....	100
4.0	INTERACTION OF GRAPHENE WITH CELLS AND THEIR CELLULAR NANO TOXICOLOGY.	
4.1	Introduction.....	104
4.2	Result and discussion.....	106
4.2.1	Physicochemical characterization.....	106
4.2.2	Interactions with Kidney epithelial cells.....	108
4.2.2.1	Intracellular uptake studies	108
4.2.4.2	Effect of graphene on cell viability	110
4.2.4.3	Effect of graphene on plasma membrane integrity	111
4.2.4.4	Detection of Apoptosis.....	112
4.2.1.8	Detection of Reactive Oxygen Species (ROS)	113
4.2.3	Interactions with macrophage cells.....	114
4.2.3.1	Uptake of graphene by macrophages.....	114
4.2.3.2	Effect on actin cytoskeletal functions.	115
4.2.3.3	Intracellular uptake mechanisms.....	117
4.2.3.4	Effect of graphene on cell viability.....	117
4.2.3.5	Effect of graphene on plasma membrane integrity.....	118
4.2.3.6	Detection of intracellular ROS.....	119
4.2.3.7	Detection of Apoptosis.....	120
4.2.4	Interactions with HUVEC cells.....	122
4.2.4.1	Cell viability analysis.....	122
4.2.4.2	Plasma membrane integrity analysis.....	123
4.2.4.3	Detection of intracellular ROS.....	123
4.2.4.4	Detection of lipid peroxidation.....	124
4.2.4.5	Level of glutathione oxidation.....	125
4.2.4.6	Detection of intracellular calcium.....	126

4.2.4.7	Detection of mitochondrial membrane potential.....	127
4.2.4.8	Detection of apoptosis/necrosis.....	128
4.2.5	Genotoxicity evaluation of graphene.....	130
4.2.5.1	Toxicogenomics analysis	131
4.2.5.2	Single cell gel electrophoresis assay (Comet assay).....	133
4.2.6	Hemocompatibility evaluation of graphene	134
4.2.6.1	Hemolysis.....	135
4.2.6.2	Platelet activation and aggregation studies.....	136
4.2.6.3	Plasma coagulation study	138
4.2.6.4	Inflammation analysis.....	140
4.2.6.5	Immune cell stimulation analysis	141
4.2.6.6	Immune cell suppression analysis.....	142
4.3	Conclusions	142
