# Table of Contents

Table of Contents v

Introduction 1

1 Preliminaries 8
  1.1 Basic concepts from Graph Theory ................................. 8
  1.2 Basic concepts from Fuzzy Graph Theory .......................... 12
  1.3 Graph structure - basic concepts ................................ 19
  1.4 Basic concepts from Algebra .................................. 20

2 Fuzzy Graph Structures - Basic Concepts 23
  2.1 Introduction .................................................. 23
  2.2 Some results on fuzzy $\rho_i$-trees and fuzzy $\rho_i$-forests ........ 28
  2.3 Generalisation ............................................... 32
  2.4 Some results on fuzzy $\rho_{i_1i_2...i_r}$-trees and fuzzy $\rho_{i_1i_2...i_r}$-forests . 35
  2.5 $\rho_i$-bridges and $\rho_i$-cut vertices ........................... 39
  2.6 $\rho_{i_1i_2...i_r}$-bridges and $\rho_{i_1i_2...i_r}$-cut vertices ............... 44
  2.7 Regularity in fuzzy graph structures ............................ 49
  2.8 Homomorphism and isomorphism ............................... 58

3 Operations on Fuzzy Graph Structures 62
  3.1 Cartesian product of graph structures and fuzzy graph structures .. 63
  3.2 Composition of graph structures and fuzzy graph structures ........ 65
  3.3 Union of graph structures and fuzzy graph structures ............... 68
  3.4 Join of graph structures and fuzzy graph structures ................ 70
  3.5 Complement of a fuzzy graph structure .......................... 74
  3.6 Some results on $\phi$-self complementary fuzzy graph structures .... 77
  3.7 $\phi$-complements of union and join of fuzzy graph structures ........ 80
4 Labelling Matrices and Index Matrices of a Graph Structure 90
4.1 Introduction 90
4.2 Labelling of the $R_i$-edges 91
4.3 Admissible $R_i$-index vectors 96
4.4 Some results on admissible $R_i$-index vectors and $R_i$-labellings for 0 101
4.5 Labelling matrix and index matrix 110
4.6 Modules of $R_i$-labellings for 0 and $\lambda_i j_i$ 122
4.7 Modules of labelling matrices for 0 and $\Lambda J$ 128

5 Graphs, Graph Structures and Incidence Algebras 143
5.1 Incidence algebra of graphs 143
5.2 Labelings and incidence algebras 145
5.3 Incidence algebra of graph structures 149
5.4 $R_i$-labellings and incidence algebras 151
5.5 Labelling matrices and incidence algebras 154

6 Labelling - Extension to Fuzzy Graphs 157
6.1 Labellings and index vectors of a fuzzy graph 157
6.2 Fuzzy Incidence 162
6.3 $(na, ni)-$extended $J$-labelling 164

7 Labelling - Extension to Fuzzy Graph Structures 166
7.1 $\rho_i$-Labellings and $\rho_i$-index vectors of a fuzzy graph structure 166
7.2 Fuzzy labellings of a fuzzy graph structure and fuzzy algebra of an incidence algebra 172
7.3 Fuzzy $\rho_i$-incidence 175
7.4 $(na_i, ni_i)-$extended $J-R_i$-labelling 178

8 Colouring - Extension to Fuzzy Graph Structures 180
8.1 Vertex colouring of a fuzzy graph structure 180
8.2 Some results on vertex colouring of a fuzzy graph structure 184
8.3 $(d_i, f_i)-$extended $\rho_i$-edge colouring of a fuzzy graph structure 186
8.4 Relation colouring of a graph structure and fuzzy graph structure 189
8.5 Total colouring of a fuzzy graph structure 190
8.6 Some results on total colouring of a fuzzy graph structure 193
9 A Look into Some Applications of Fuzzy Graph Structures

9.1 Applications in Environmental Science

9.2 Applications in Social Science

9.3 Applications in Geography

9.4 Applications in Linguistics
