</table>
4.2.2. Results of the Canonical analysis between Predictor Variables and Likelihood of Purchase Variables.

4.2.3.A. Results of the Canonical analysis between Personality Variables and Frequency of Purchase Variables.

4.2.3.B. Results of the Canonical analysis between Personality Variables and Likelihood of Purchase Variables.

4.2.4.A. Results of the Canonical analysis between Perceptual Variables and Frequency of Purchase Variables.

4.2.4.B. Results of the Canonical analysis between Perceptual Variables and Likelihood of Purchase Variables.

4.2.5.A. Results of the Canonical analysis between Motivational Variables and Frequency of Purchase Variables.

4.2.5.B. Results of the Canonical analysis between Motivational Variables and Likelihood of Purchase Variables.

4.3.1. For the Criterion Variable using Frequency of Purchase Measure

4.3.1.A. Number of Cases belonging to Group 1 (Least Frequent) and Group 2 (Most Frequent) purchasers of Health/Medicinal Products

4.3.1.B. Correlations between the Predictor Variables and the Discriminant Functions, Canonical Correlations, Eigen and Chi-Squared Values and their significance levels for Health/Medicinal products

4.3.1.C. Total Percent of Cases Correctly Classified for each of the Six Products belonging to Health/Medicinal Product Group
4.3.1.D. Number of Cases belonging to Group 1 (Least Frequent) and Group 2 (Most Frequent) purchasers of Socially oriented Products

4.3.1.E. Correlations between the Predictor Variables and the Discriminant Functions, Canonical Correlations, Eigen and Chi-Squared Values and their significance levels for Socially oriented products

4.3.1.F. Total Percent of Cases Correctly Classified for each of the Six Products belonging to Socially oriented Product Group

4.3.1.G. Number of Cases belonging to Group 1 (Least Frequent) and Group 2 (Most Frequent) purchasers of Personal Grooming/Care Products

4.3.1.H. Correlations between the Predictor Variables and the Discriminant Functions, Canonical Correlations, Eigen and Chi-Squared Values and their significance levels for Personal Grooming/Care products

4.3.1.I. Total Percent of Cases Correctly Classified for each of the Six Products belonging to Personal Grooming/Care Product Group

4.3.2. For the Criterion Variable using Likelihood of Purchase Measure

4.3.2.A. Number of Cases belonging to Group 1 (Least Frequent) and Group 2 (Most Frequent) purchasers of Health/Medicinal Products

4.3.2.B. Correlations between the Predictor Variables and the Discriminant Functions, Canonical Correlations, Eigen and Chi-Squared Values and their significance levels for Health/Medicinal products
4.3.2.C. Total Percent of Cases Correctly Classified for each of the Six Products belonging to Health/Medicinal Product Group

4.3.2.D. Number of Cases belonging to Group 1 (Least Frequent) and Group 2 (Most Frequent) purchasers of Socially oriented Products

4.3.2.E. Correlations between the Predictor Variables and the Discriminant Functions, Canonical Correlations, Eigen and Chi-Squared Values and their significance levels for Socially oriented products

4.3.2.F. Total Percent of Cases Correctly Classified for each of the Six Products belonging to Socially oriented Product Group

4.3.2.G. Number of Cases belonging to Group 1 (Least Frequent) and Group 2 (Most Frequent) purchasers of Personal Grooming/Care Products

4.3.2.H. Correlations between the Predictor Variables and the Discriminant Functions, Canonical Correlations, Eigen and Chi-Squared Values and their significance levels for Personal Grooming/Care products

4.3.2.I. Total Percent of Cases Correctly Classified for each of the Six Products belonging to Personal Grooming/Care Product Group

4.4.1. Mean Scores of Predictor Variables for Three Groups (Cluster) of Frequency of Purchase, F values and significance levels

4.4.2. Mean Scores of Predictor Variables for Three Groups (Cluster) of Likelihood of Purchase, F values and significance levels
For Criterion Variable Using Frequency Measure

Showing the Step, Action taken (entered/removed), Change in Rao's V and significance levels

Standardized Canonical Discriminant Function Coefficients

Discriminant Functions, Eigen Values, % of Variance, Canonical Correlations, Chi-Squared and their significance

Correlations between Predictor Variables and the First Discriminant Function, Eigen Value, Canonical R, Chi-Squared and their significance level

Classification Results of the Actual Group Membership and the Predicted Membership

For Criterion Variable Using Likelihood Measure

Showing the Step, Action taken (entered/removed), Change in Rao's V and significance levels

Standardized Canonical Discriminant Function Coefficients

Discriminant Functions, Eigen Values, % of Variance, Canonical Correlations, Chi-Squared and their significance

Correlations between Predictor Variables and the First Discriminant Function, Eigen Value, Canonical R, Chi-Squared and their significance level

Classification Results of the Actual Group Membership and the Predicted Membership
