Acknowledgements

I offer most sincere and hearty thanks to LORD SWAMINARAYAN and my guru H. D. H. PRAMUKHASWAMI MAHARAJ, whose blessings helped me to get this opportunity and enable me to complete my research for the PhD degree smoothly.

I am thankful to my parents, sisters, brother and satsangi for their moral support, love and encouragement which helped me to overcome the difficulties, which I faced during my research work.

I am thankful to Prof. A. K. Rakshit, former Head, Department of Chemistry and Prof. S. G. Devi, Head, Department of Chemistry for providing me with the necessary laboratory facilities. I also offer my sincere thanks to Profs. A. C. Shah, H. S. Rama, B. V. Kamath and the senior teachers of the Department for their kind encouragement.

I sincerely acknowledge my gratitude for the help provided for different analytical studies by the different Regional Sophisticated Instrumentation Centres, IIT Bombay, IIT Madras, CBRI Lucknow, IIT Roorkee and the Alembic Ltd. I am thankful to Dr. Prashant Bhatt and Dr. Trupti Pathak of the Chemistry Department of Bhavnagar University and Prof. S. Menon of the Chemistry Department of Gujarat University for the help in conducting the electrochemical studies of some of my complexes. I acknowledge the help provided by Dr. Prakash Samnani during the Gas Chromatographic studies of the catalytic reactions. I am thankful to Dr. J. S. Dave and Pratik Patel of the Applied Chemistry Department of this University for their help in the study of the Liquid Crystalline materials.

I am thankful to Mrs. Mary Yohannan, Incharge Head, Department of Applied chemistry, Dr. R. R. Darji and other staff members of the polytechnic of the M S. University, Baroda for their support. I acknowledge the help and cooperation provided by all my friends including Meeta. I sincerely acknowledge the help and inspiration provided by my senior Dr. Sujit Dutta to bring this work to completion.

(Daksha Patel)
