ACKNOWLEDGMENTS

The author wishes to express his sincere gratitude to Dr. Lloyd F. Rader, Professor of Civil Engineering, University of Wisconsin, under whose capable guidance this investigation was carried out at the Highway Materials Research Laboratory of the Civil Engineering Department. Besides the continual encouragement and assistance, his valuable and highly esteemed suggestions and critical reviews have contributed directly in shaping this research project and the report.

The author is also highly indebted to Prof. P. J. Madan, Pro-Vice-Chancellor, The Maharaja Sayajirao University, Baroda, for his expert guidance and valuable suggestions from time to time, sparing his precious hours in spite of his extremely heavy duties. The investigation would not have been completed but for his keen interest.

The author takes this opportunity to acknowledge the use of the facilities of the Testing Laboratory of the State Highway Commission of Wisconsin in conducting this investigation. The experience and interest of Mr. George H. Zuehlke, Materials Test Engineer, Miss Eva M. Sommers and Mr. Noel Gaudette
are highly appreciated. The co-operation of Professor Ralph W. Kiefer and Mr. Lynn Larson is duly acknowledged. The assistance of Messrs. Gerald C. Christofferson, Kenneth R. Klitzman, Raymond W. Schmid, and Dean F. Dopkins, is sincerely appreciated. Acknowledgment is also made to the U.S.A. I.D. for the support given to the author at the University of Wisconsin.
