CONTENTS

Chapter I : GENERAL INTRODUCTION TO PROSTAGLANDINS 1.-31
   Introduction                                    1
   References                                     29

Chapter II : A TWO-CARBON REGIOSPECIFIC INSERTION: AN EFFICIENT SYNTHESIS OF METHYL 9,12-DIOXOEICOSANOATE, A PROSTANOID PRECURSOR 32-90
   Abstract                                       32
   Introduction                                   33
   Strategy                                       33
   Results and Discussions                        35
   Experimental                                   52
   Spectra                                        64
   References                                     86

Chapter III : CONVERSION OF RICINOLEIC ACID TO PGE₁ 91-187
   Abstract                                       91
   Introduction                                   92
   Strategy                                       94
   Results and Discussions                        96
   Experimental                                   122
   Spectra                                        144
   References                                     183
Chapter IV: SYNTHESIS OF ETHYL 9,12-DIOXO-CIS-10,11-ISOPROPYLDIENEDIOXY-EICOS-TRANS-13-ENOATE, A HIGHLY FUNCTIONALIZED PROSTANOID PRECURSOR

Abstract
