List of table | iii
List of figures | iv
List of plates | v

CHAPTER I: INTRODUCTION
1.1 Watershed management | 1 – 4
1.2 Watershed approach for conservation and development | 4 – 6
1.3 Major issues in watershed management | 6 – 7
1.4 Watershed management in India | 7 – 9
1.5 Statement of the problem | 9 – 10
References | 11 – 13

CHAPTER II: REVIEW OF LITERATURE
2.1 Drainage basins, the units for resource management | 14
2.2 Geomorphology and its Analysis Using GIS and Remote Sensing | 14 – 19
2.3 Watershed prioritization | 19 – 20
2.4 Run-off and sediment production rate | 20 – 21
2.5 Normalized difference vegetation index (NDVI) | 21 – 22
2.6 Phytosociology | 22 – 23
2.7 Agriculture and socio-economy | 23 – 24
References | 25 – 33

CHAPTER III: STUDY AREA AND METHODOLOGY
3.1 Study area | 34 – 51
3.2 Methodology | 52 – 64
References | 65 – 67

CHAPTER IV: RESULT
4.1 Physiography | 68 – 79
4.1.1 General remarks | 68 – 69
4.1.2 Estimation of morphometric parameters | 69 – 71
4.1.3 Watershed shape factors | 71 – 72
4.1.4 Drainage pattern factors | 72 – 76
4.1.5 Topographic factors | 76 – 77
4.1.6 Estimation of Run-off and sediment production rate | 77 – 79
4.2 Soil | 79 – 83
4.3 Climate | 84 – 85
4.4 Elevations | 85 – 87
4.5 Aspect | 88 – 89
4.6 Slope | 90 – 91
4.7 Land capability class | 92 – 94
4.8 Land use/Land cover | 95 – 104
4.9 Normalized difference vegetation index | 105 – 107
4.10 Cropping system | 108 – 111
4.10.1 Agriculture | 108 – 109
